

Subject Code	AF5108
Subject Title	Accounting for Managers
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This course provides an introduction to the fundamental concepts and analytical techniques of financial and managerial accounting. It supports the achievement of the Master of Business Management (MSc BM) Program Outcomes by enhancing students' understanding of basic financial and managerial accounting information within a company. Students will learn how economic transactions are recorded in the accounting system and compiled into various financial statements. Additionally, they will explore how relevant cost accounting information can be applied in budgeting, controlling, and performance evaluation. By the end of the course, students are expected to comprehend the financial information generated by accounting systems and critically evaluate and apply both financial and managerial accounting data to analyze a company's financial position (MSc BM Outcome 1a). Furthermore, students will gain preliminary insights into the applications and implications of the latest technologies in business practices and decision-making. (MSc BM Outcome 1b).
Intended Learning Outcomes	Upon completion of the subject, students will be able to: Financial Accounting (FA) - Understand the accounting system of an organization (both profit making and non-profit making). - Record accounting information properly and communicate with accounting information effectively. - Understand the basic concepts and principles underlying the financial statements, and be able to interpret financial statements, including balance sheet, income statement and cash flow statement. - Identify the characteristics of good corporate governance and apply the knowledge in analysing the potential governance problems. Managerial Accounting (MA) - Be familiar with various managerial accounting techniques such as CVP, contribution margin concepts, relevant costing, etc. - Utilize managerial accounting information in budgeting, controlling and performance evaluation. - Be aware of the limitation of accounting information.

Subject Synopsis/ Indicative Syllabus	Financial Reporting Systems and Accounting Procedures Concepts and principles underlying financial statements, measuring and reporting assets and equities Techniques of Analysing Financial Statements Ratio analysis, vertical analysis, horizontal analysis Corporate Governance Principles and issues relating to internal control Cost Behaviour and Decision Making Cost-volume-profit analysis, cost estimation, relevant costing Concept of Cost Allocation and Measurement Importance of cost allocation in understanding and interpreting cost informationin business decisions. Management Control Process Responsibility accounting concepts, segment reporting, performance measures(i.e., ROI, Residual income), basic concepts and methods of investment appraisals				
Teaching/Learning Methodology	The teaching and learning methodology incorporate a flipped learning approach, where students review the core concepts and issues outlined in the Indicative Contents prior to class. In-class time is then dedicated to seminars that facilitate in-depth discussions and critical analysis. Exercises, problems, and short case studies are used during these sessions to illustrate key concepts and enhance students' understanding. This interactive format encourages active participation, maximizing the exchange of knowledge and diverse perspectives among students.				
Assessment Methods in Alignment with Intended Learning Outcomes		Specific assessment method/tasks	% Weighting	Financial Accounting	Managerial Accounting
	1	Case presentations and discussions	15%	✓	✓
	2	Mid-term test	20%	✓	n.a.
	3	Participation	15%	✓	✓
	4	Final Examination	50%	✓	✓
		Total	100%	✓	✓
	Explanation of the appropriateness of the assessment methods in assessing the intended programme learning outcomes: Application of concepts (MSc BM outcome 1a) can be assessed by Final Subject Grade (FSG). Understanding entrepreneurship (Msc BM outcome 1b) can be assessed by Subject-Embedded-Assessment (SEA). Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:				

	1. Students will be arranged to analyse real life business cases and present their analyses in groups which encourage students to apply concepts and techniques in business cases and problems. 2. Mid-term test and final examination are used to test students' understanding of accounting concepts and the ability to apprehend and resolve problems. 3. Participation marks are awarded based on students' engagement with pre-class video watching and exercises, as well as their active involvement in in-class exercises. This system is designed to encourage students to think critically and contribute actively during class discussions. To reflect the significant technology content in this subject, 10% (or more) of the overall weighting of this subject is based on individual assessment concerning technology-related knowledge.	
Student Study Effort Expected	Class contact:	
	▪ Lectures / Seminars	39 Hrs.
	Other student study effort:	
	▪ Assignments, projects, pre-class activities	36 Hrs.
	▪ Revision	45 Hrs.
	Total student study effort	120 Hrs.
