

Subject Code	AF5112
Subject Title	Management Accounting
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This subject aims to equip students with a thorough understanding in management accounting concepts and techniques, and to provide them with an understanding of the uses and limitations of data in planning, control and decision making. It contributes to the achievement of PgDPA/MPA Programme Outcomes by enabling students to <u>use cost accounting and financial accounting information effectively for planning, control and decision making, appreciate management accounting as an interdisciplinary subject</u> in its context as an information and decision support system within the modern industrial and commercial organizations and <u>apply planning and control techniques for strategy formulation and implementation</u> (Programme Outcome 2).
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) <u>explain the overall management accounting framework</u> and its implications in business context; (b) <u>explain the key costing concepts and the various costing systems in both traditional and contemporary manufacturing environment and determine product cost</u> under traditional and contemporary costing systems; (c) <u>explain the planning and control framework and their implications to management functions and use financial / non-financial information to aid planning and control</u>; (d) <u>prepare, analyse and visualize management accounting information and other factors when assisting management decision making</u>; (e) <u>explain management accounting as an interdisciplinary subject</u> in a context where accounting information is used to assist managerial decision-making within modern industrial and commercial organizations.
Subject Synopsis/ Indicative Syllabus	Introduction to Management Accounting The function of management. The difference between financial accounting and management accounting. Ethical issues in management accounting.

	Job-order and Process Costing The flow of cost. Problems of overhead application. Job-order costing in service companies. Equivalent unit computations. First-in-first-out and weighted average method. Activity-based Costing ABC vs. traditional costing systems. Cost pools and cost hierarchies. First and second stage allocation. Activity-based management. Joint and By-product Costing Differentiate between joint and by-products. Accounting for joint and by-products. Cost-Volume-Profit Analysis and Decision Making Review of Cost Behavior. Approaches to analyse the cost function. Breakeven point for single and multi-product settings. The concepts of operating leverage and margin of safety. Use of relevant cost in different decision environments. Buy versus make decision. Keep or abandon. Decision Making under Uncertainty. Standard Costing and Budgeting Budgetary Process. Behavioural aspects of the budgetary process. Basic and advance variance computations. Application of variances in management control. Performance Measurement Review of different performance indicators. The choice of the appropriate performance measures. Behavioural aspects of performance measures.
