Resource-based approach to organisational analysis. Distinctive competencies and competitive advantage. Value chain analysis. Variations in business models.

Strategy Formulation and Implementation

SWOT analysis. Corporate and business strategies. Organizing and staffing for implementing strategies.

Evaluation and Control

Measuring organisational performance.

Teaching/Learning Methodology	Seminars will combine lectures and in-class activities. The lectures will focus on the key concepts, theories, and contemporary issues of strategic management and information systems. The in-class activities, such as business problem discussion, require students to apply the theories and concepts learned in the lectures.							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d	e	f
	Individual assignment	20%		√		√		√
	Group project	15%	√	√	√			
	Pre-class work, class participation, quiz	15%	√	√	√	√	√	√
	Final examination	50%	√	√	√	√	√	√
	Total	100 %						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: To reflect the significant technology content in this subject, 10% (or more) of the overall weighting of this subject is based on individual assessment concerning data analytics-related knowledge. Pre-class work, class participation, quiz: This is assessed based on the student’s preparation before class such as watching the lecture and other videos, reading cases and articles and completing the knowledge check exercises. Class participation and quiz components encourage students to provide active feedback on the subject materials taught each week. Group project and individual assignment: The group project requires students to apply strategic management concepts in real-life organisations. The individual assignment enables students to apply the end-user development concept to create relevant management information dashboards. Final examination The final examination is a three-hour examination which comprises cases/problems relating to all the learning outcomes.							

	<i>Note: To pass this subject, students are required to obtain Grade D or above in BOTH the Continuous Assessment and Examination components. In addition, the specific requirements on individual assessment components discussed above could be adjusted based on the pedagogical needs of subject lecturers</i>	
Student Study Effort Expected	Class contact:	
	13 weeks of three-hour seminar	39 Hrs.
	Other student study effort:	
	Class preparations, reading subject materials/textbook, and assignments	78 Hrs.
	Total student study effort	117 Hrs.
