

Subject Code	AF5131
Subject Title	Accounting
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This MBA course provides an overview of the accounting function from a general manager's perspective. This subject also prepares managers to utilize accounting information to make sound managerial decisions in organizations. Besides learning the principles and techniques of financial reporting, financial statements analysis, decision-making, and management control, students will be able to apply their accounting knowledge in solving complex business problems (Outcome 1). In addition, students will be able to interpret and analyze accounting reports and understand the implications of those reports to various stakeholders in the organization. (Outcome 4)
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Explain the role of accounting in organizations and how it supports general managers' functions. - Explain the basic concepts and principles underlying the financial statements and be able to analyze and interpret financial statements. - Utilize accounting information to facilitate decision-making, planning, and controlling. - Formulate business recommendation on complex business problems based on accounting knowledge.
