

Subject Code	AF5322
Subject Title	Corporate Risk Management
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	Pre-requisite: Investments (AF5344) Exclusion: Risk Management for Corporations (AF5333) Business Risk Management (AF5336)
Objectives	This course is to prepare students to establish the body of knowledge necessary for independent risk management analysis and decision-making. It builds on basic finance concepts and gives the students an understanding on how a business can identify, measure and control its risks. It contributes to the achievement of the MoF programme outcomes by enabling students to identify, explain and solve real-life risk management problems of non-financial and financial institutions (Outcome 2).
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a. Understand the basic principles of risk management and the role of risk management in business firms b. Identify and analyze underlying factors that lead to good/poor risk management of a business c. Use relevant tools to identify, measure and control risk exposure related to operation, financing and investment in a global market d. Apply Value-at-Risk (VAR) methodology to assess various types of risk for a business e. Understand the development of FinTech and evaluate the implications of such technologies as AI and machine learning, blockchain and big data for risk management
Subject Synopsis/ Indicative Syllabus	Basic Concepts of Risk and Risk Management Definitions of risk and risk management. Risk concepts and processes. Risk Identification, Measurement and Control Classification of risk. Basic tools. Value-at-Risk (VAR). Stress testing. Liquidity Risk Asset liquidity risk. Funding liquidity risk.
