

Subject Code	AF5353
Subject Title	Security Analysis and Portfolio Management
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	Pre-requisite: Investments (AF5344) Have good knowledge of using basic functions and commands in EXCEL
Objectives	There are two major emphases in this course. The first part of the course focuses on portfolio analysis and the second part of the course focuses on investment management process. This subject helps achieve the MoF Outcomes by enabling students to apply financial theories and concepts to conduct portfolio analysis with real investment problems and solve asset management issues (Outcome 2), and to formulate financial strategies (Outcome 3). This subject also enables students to understand the roles of financial technologies (such as artificial intelligence (AI), big data, cloud computing and others) in the financial markets.
Intended Learning Outcomes	Upon successful completion of this course, students should be able to: a. Understand Risk and Return in the financial markets b. Give recommendation of investment plans based on investors' circumstance including policy statement, asset allocation strategy, mutual fund selection, and the portfolio construction c. Apply single-factor and multifactor models to construct real equity portfolios d. Evaluate the performance of equity funds with up-to-date performance measures e. Understand and evaluate how the new technologies, including artificial intelligence (AI), big data and data analytics, and cloud computing influence the development of the financial markets
Subject Synopsis/ Indicative Syllabus	The Mean-Variance Analysis and Portfolio Optimization in Practice The issues in the use of the mean-variance optimization in practice and possible solutions for them. Asset Pricing Models and Factor Models The single-factor model and multi-factor models; the correlation structures of security returns under asset pricing models; and the applications of asset pricing models in equity portfolio construction. Investment Management Process Policy statement, asset allocation strategy, portfolio construction and implementation, and international issues. Equity Portfolio Management Strategies Asset allocation strategies; active, passive and semi-active portfolio management strategies. Portfolio Performance Evaluation and Risk Measure Holding-based portfolio performance measures; and an introduction of downside risk measures and the Value-at-Risk measure.

	Alternative Investment and Structured Securities An introduction of alternative investments, hedge fund strategies and pricing structured securities. Behavioral Finance (Optional) The impact of heuristic-driven biases on investment decision making including representativeness, overconfidence, anchoring-and-adjustment, and aversion to ambiguity.							
Teaching/ Learning Methodology	Key concepts and techniques will be introduced through lectures. The course places a lot of emphasis on project work. Students will be required to deliver a project which emphasizes on real-world investment issues. By completing the project, students should have hands-on experience in using the knowledge they have learned in class to solve investment problems in practice. Students are encouraged to share their views and experiences actively with their lectures and classmates.							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d	e	
	1. Class Participation	5%	✓	✓	✓	✓		
	2. Project & Assignment	25%	✓	✓	✓	✓	✓	
	3. Individual Report	10%	✓	✓	✓	✓	✓	
	4. Midterm	25%	✓	✓	✓			
	5. Final examination	35%	✓	✓	✓			
	Total	100 %						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Note: The specific requirements on individual assessment components discussed above could be adjusted based on the pedagogical needs of subject lecturers. To reflect the significant technology content in this subject, 10% of the overall weighting of this subject is based on individual assessment concerning technology-related knowledge.							
Student Study Effort Expected	Class contact:							
	▪ Lectures / Seminars					39 Hrs.		
	Other student study effort:							
	▪ Reading materials / textbook questions					39 Hrs.		
	▪ On average around 16 hours will be spent on the individual critique and around 20 hours for the group project discussion, presentation and written report					36 Hrs.		

	Total student study effort	114 Hrs.
