

Subject Code	AF5635
Subject Title	Global Economy and Business
Credit Value	3
Level	5
Normal Duration	One Semester
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This subject introduces students to the theory and application of economics and guides them to understand how firms operate in a global economic environment. It contributes to the achievement of the MBA intended learning outcomes by enabling students to analyze and solve business problems through applying economic concepts in a critical manner (Outcome 1). Students will also be able to interpret and analyze the implications of global economic conditions to their business and the society (Outcome 5).
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - evaluate the impact of microeconomic and macroeconomic factors on business decisions - evaluate the current issues facing the global economy - explain the driving forces of globalization and analyze the trends of international trade and investment - analyze the global economic environment using economic and financial data
Subject Synopsis/ Indicative Syllabus	Basic economic tools for global business Individual and strategic decision making, Demand and supply analysis, Market structures and information, Measures and determination of macroeconomic activities Globalization, international trade and finance Drivers of globalizations, international trade and comparative advantages, Foreign direct investment, Trade policies, Balance of payments and exchange rate systems, International capital flows Government policies in a global setting Central banks, Fiscal and monetary policies in a global setting, International financial systems, Financial crises
Teaching/Learning Methodology	The subject will be taught in both lecture and seminar formats. Lectures will focus on the explanation and application of economic concepts and seminars are designed to provide the environment for discussion and critical analysis of the subject materials through exercises and problem solving. Cases are used extensively to enable students to synthesize economic concepts and apply professional judgement to address complex real-world business problems. Students are expected to participate actively in class activities.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d		
	1. Class discussions	20%	✓	✓	✓			
	2. Quiz	15%	✓	✓	✓			
	3. Group case presentation and report	40%	✓	✓	✓			
	4. Individual assignment (with data analysis)	25%	✓	✓	✓	✓		
	Total	100 %						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Students will develop critical thinking and decision-making skills from economic principles (Outcome 1) by preparing for the term quiz (item 2), conducting data analyses when completing the individual assignment (item 4), and analyzing the complex issues involved in the case assignment (item 3). Meanwhile, students will develop their global outlook (Outcome 5) through class discussions on global economic issues (item 1), and in group case presentation and report (item 3) as it offers students the opportunity to analyze global economic issues faced by corporations. To reflect the significant technology content in this subject, 10% (or more) of the overall weighting of this subject is based on individual assessment concerning technology-related knowledge.							
Student Study Effort Expected	Class contact:							
	▪ Lectures / Seminars		39 Hrs.					
	Other student study effort:							
	▪ Self-study		40 Hrs.					
	▪ Preparation of case analysis and assignment		40 Hrs.					
	Total student study effort		119 Hrs.
