

Subject Description Form

Subject Code	AMA1501
Subject Title	Introduction to Statistics for Business
Credit Value	3
Level	1
Co-requisite	Nil
Exclusion	Introduction to Statistics (AMA1502/AMA1602)
Objectives	This subject aims to: (i) provide students with a variety of basic techniques in understanding and interpreting data; (ii) allow students to develop skills in analyzing scenarios and problems in commerce and industry by applying statistical methods. The emphasis will be on applications of elementary statistical methods to commerce and industry.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a. use a variety of basic techniques in understanding and interpreting data; b. apply elementary statistical methods in analyzing business scenarios and problems; c. think critically and creatively about the uses and limitations of statistical methods in business; d. use statistical package and interpret the output, appreciate the applications of information technology for statistical analysis in business.
Subject Synopsis/ Indicative Syllabus	Descriptive Statistics Presentation of business data in tabular, diagrammatic and graphic forms; misleading presentations. Summary measures of location and spread. Probability Concepts of probability. Probability rules. Bayes' Theorem. Random variables and expected values; uses and limitations in decision making. Common probability distributions: Binomial, Poisson and Normal. Estimation Simple random samples. Sampling distributions: mean, proportion and differences. Confidence intervals: mean, proportion and differences.

	Hypothesis Testing Hypothesis testing: mean, proportion and differences. Chi-square Test Test of goodness of fit. Test of independence. Relationships between Variables Exploratory data analysis. Linear relationships: ordinary least squares. Correlation coefficients. Multiple Regression Multiple regression equation. Inferences about parameters. Modelling techniques																																		
Teaching/Learning Methodology	The lectures aim to provide students with the integrated knowledge required for the understanding and application of statistical concepts and techniques. To develop students’ abilities for logical thinking and effective communication, tutorial, presentation sessions and in-class activities will be held.																																		
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="4">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th></tr><tr><td>1. Assignments, Presentation and In-class Activities</td><td>25%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>2. Mid-term Test</td><td>25%</td><td>✓</td><td>✓</td><td>✓</td><td></td></tr><tr><td>3. Examination</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>Total</td><td>100 %</td><td colspan="4"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The subject focuses on knowledge, skill and understanding of <u>Business Statistics</u>, thus, <u>Exam-based assessment</u> is the most appropriate assessment method, including 25% test and 50% examination. Moreover, 25% worth of assignments, presentations and in-class activities are included as a component of continuous assessment so as to keep the students in progress.	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)				a	b	c	d	1. Student Study Effort Expected	Class contact:	
	▪ Lecture	26 Hrs.
	▪ Tutorial	13 Hrs.
	Other student study effort:	
	▪ Assignments	20 Hrs.
	▪ Self-study	58 Hrs.
	Total student study effort	117 Hrs.
