Objectives	This subject provides students with essential psychological knowledge and skills pertinent to interpersonal relationships. It enables students to assess the relevance of both theoretical and practical issues of human relationships, with an emphasis on applying the acquired psychological knowledge in different settings. It is also aimed at implanting in students an interest and insight to develop interpersonal skills and relate effectively to people with different needs and problems. The subject also enables students to evaluate the applicability of using Western psychological approaches to cope with interpersonal relationships in the Chinese cultural context.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: - Know and comprehend concepts and practical skills in the psychology of interpersonal relationships; - Increase self-awareness and develop insight in tackling practical issues of human relationships; - Evaluate how to apply Western psychological approaches to cope with interpersonal relationships in the Chinese cultural context; - Use the psychological concepts acquired to analyze and manage interpersonal relationships in daily life, and/or relevant professional practice.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	- The Basics of Relationships and Research Methods - The nature and importance of interpersonal relationships - Sources of influence - The dark side of relationships - The history of relationship science - Research methods - Ethical issues - Attraction - Proximity - Physical attractiveness - Reciprocity - Similarity - Barriers - Social Cognition - First impressions - The power of perceptions - Impression management - Communication - Nonverbal communication - Verbal communication - Dysfunctional communication - Interdependency - Social exchange - The economics of relationships - The nature of commitment - Friendship - The nature of friendship - Friendship across the life cycle - Differences in friendship - Friendship difficulties - Love - History of love - Types of love - Individual and cultural differences in love

	8. Stresses and Strains - Perceived relationship value - Hurt feelings - Ostracism - Jealousy - Deception and lying - Betrayal - Forgiveness 9. Maintaining and Repairing Relationships - Maintaining and enhancing relationships - Repairing relationships																																								
Teaching/Learning Methodology (Note 3)	In anticipation of a diverse student population for this subject, a variety of teaching and learning strategies will be employed to look after the learning needs and develop the learning skills of students having very different academic and professional training background. These include didactic teaching through lectures, brief reflections in the end of each session, and questioning at, self-learning through weekly bite-size exercises, and integrative learning through individual reflections. The purpose is to implant a solid theoretical foundation in the psychology of interpersonal relationships and at the same time to encourage the learning of the psychology of interpersonal relationships from everyday life.																																								
Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="4">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th></tr><tr><td>1. 	learning. Giving students opportunities to conduct a group project and present their project during class can facilitate their involvement in the class activities. As students are from different departments, learning and sharing in a group also helps them build a sense of community in the university and foster understanding interpersonal relationship from different perspectives. 2. The individual assignment enables students to read updated literature about interpersonal relationship, and promotes the ability of understanding and summarizing knowledge from literature. 3. For the MC quizzes, accuracy of understanding is essential. Students need to apply basic concepts in analyzing human behaviours. 4. For the class activities, active participation will be valued. Different types of activities, such as online polling or discussions, will be used to help students recognize, apply and evaluate related concepts.	
Student Study Effort Expected	Class contact:	
	▪ Lecture	39 Hrs.
	Other student study effort:	
	▪ Reading and preparing for quizzes	35 Hrs.
	▪ Preparing group project	15 Hrs.
	▪ Reading literature and completing individual assignment	15 Hrs.
	Total student study effort	104 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon completion of the subject. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/ Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time over-crowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method purports to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
