

The Hong Kong Polytechnic University
Subject Description Form

Subject Code	AP5020					
Subject Title	Project					
Credit Value	6					
Level	5					
Pre-requisite / Co-requisite/ Exclusion	Each student should propose a ‘technological sound’ project by himself/herself and obtain agreement from a potential professor to accept as your supervisor at the first week of the semester who will bear the cost of using experimental equipment and consumables during the project. The project will be last for the entire academic year.					
Objectives	Independent project carried out under the supervision of a faculty member.					
Intended Learning Outcomes	Upon completion of the project, students will be able to: (a) gather, organize and critically evaluate information needed to formulate and solve problems; (b) apply acquired knowledge effectively and efficiently to the research topics; (c) apply advanced techniques to solve problems independently without supervision; and (d) design and conduct of various experiments independently throughout the project.					
Subject Synopsis/ Indicative Syllabus	Literature review: The students are required to give a comprehensive review of the research topic they proposed from this project. Theoretical studies of the proposed topic of studies: The feasibility of the proposed topic of a research project to be conducted in PolyU is studied. An alternative approach should be provided in case of problems arising during the course of the project. Experimental verification of proposed topic of studies: The deduced solving approach to the proposed project is implemented in PolyU. Refinement of the proposed solutions will be applied accordingly. Project report and oral presentation: Training of thesis writing and oral presentation will be provided by their supervisors.					
Teaching/Learning Methodology	Independent studies: The students are expected to look for critical problems and solve the problems independently through the course of the project. Research supervision: Supervision will be provided by the project supervisor to guide the student to overcome the difficulties during the course of the project.					
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)			
			a	b	c	d
	1. Oral presentations	30%	✓	✓	✓	✓
	2. Thesis	70%	✓	✓	✓	✓
	Total	100 %				

	Oral presentations are aimed to check the progress of students throughout the course, assisting them in self-monitoring their performances. The thesis will be used to assess the knowledge acquired by the students, as well as to determine the extent to which they have achieved the intended learning outcomes.	
Student Study Effort Expected	Supervision/Laboratory Training:	
	▪ Minimum contact hour	2 Hrs/week
	Student study efforts:	
	▪ Reading, self-study, and hand-on	5 Hrs/week
	The total student study effort	7 Hrs/week for 1 academic year
Reading List and References	To be provided by the supervisor(s).
