

Subject Code	CHC336P
Subject Title	Science and Technology Development in Asia through the Gender Lens 性別與亞洲科技的發展
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	The aim of this subject is to discuss Asian science and technology from the gender perspective and thus to develop a critical sense for comparative method around Asia. With an exploration of how a body of empirical, practical, and theoretical knowledge developed, students will be guided to see various aspects of science and gender in imperial China, Japan and Korea. Particular attention will be given to the relation between women and their roles in the development of science: how were they involved? How did they use and practice science and technology in life? How did they actively contribute? What were the values? Historiographies and historical sources are analysed and current theories are introduced. Students will engage with primary sources in Chinese or English (partly by way of translations) on an introductory to medium level.
Intended Learning Outcomes (<i>Note 1</i>)	Upon completion of the subject, students will be able to: a) have an in-depth understanding of the relation between gender and crucial technologies in Asia; b) understand from a broader perspective that women had profound influence on science and technology; c) gain new perspectives in evaluating the stereotypical misconception that ignored women's contribution or labelled women as un-knowledgeable; d) increase historical sensitivity by observing the trajectory of technological innovations from traditional age to the present day; e) develop analytical skills by textual study, hands-on activities, and visual-based analysis of web sources and museum sources.
Subject Synopsis/ Indicative Syllabus (<i>Note 2</i>)	1. Introduction: conceptualizing the bond between gender and technology in Asia Part 1: material base and the crafting of virtues 2. The <i>nei/wai</i> and a place of women's own 3. Household management: the <i>nei</i> as a knowledge field 4. Farming and weaving: gender labour division in agriculture 5. Clothes, garments and moral values Part 2: body and medicine 6. Foodbonding: female body and the crafting of womanly virtues 7. Birth and reproductive methods 8. Child raising technologies

	9. Medicine and health care from a gender perspective Part 3: writings, arts and gender 10. Gender and arts as reflected in paintings 11. Women’s writing and knowledge transmission 12. Female artisans 13. Conclusion: towards the conceptualization of “modern” technology																																														
Teaching/Learning Methodology (Note 3)	There will be two 50-minute lectures and one 50-minute tutorial each week. Textual, pictorial, audio, and video materials will be the teaching aids in the lectures. Students are required to prepare class readings before joining tutorial discussion and presentation. At the beginning of the semester students will select a topic or an issue concerning Chinese science and civilisation to study with and later deliver oral presentations in tutorials. Students are required to submit a written final essay developed from a self-selected topic and in accordance with the instructor’s suggestions.																																														
Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th></th></tr><tr><td>1. Final Essay</td><td>40%</td><td>√</td><td>√</td><td>√</td><td>√</td><td>√</td><td></td></tr><tr><td>Total</td><td>100 %</td><td colspan="6"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: 1. The quizzes, including the mid-term and final ones, comprising multiple choice questions and short answer questions, will help students gauge the key concepts and major issues of contents covered in the lectures. 2. Oral presentations can best assess the students’ overall grasp of the knowledge and skills. It is also a best opportunity for students to raise their questions, interact with each other, and actively participate in discussion. 3. The final essay 1500-2500 words (2000-3000 characters if the subject is offered in Chinese), done in accordance with the instructor’s	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)						a	b	c	d	e		1.
