

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	CHC425P
Subject Title	Modern Global History of Health and Development 現代全球健康與發展史
Credit Value	3
Level	4
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This course explores the history of international efforts to improve health in developing countries from the age of tropical medicine and colonial health services to contemporary initiatives in disease eradication and alternative health delivery systems. It examines the roles of various state and non-state actors, such as the Rockefeller Foundation, WHO, UNICEF, the World Bank, and the International Red Cross, within the broader context of colonial and post-colonial development in Asia (with a focus on China), Africa, and Latin America. By doing so, it investigates the economic, political, and cultural factors that have shaped international health practices and ideas in these regions. The course will specifically investigate the Chinese experience to understand local responses to the changing patterns of healthcare and disease prompted by international health interventions. Course materials include primary texts, secondary literature, and visual materials.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: a) discuss the history of major international health programs and campaigns; b) assess the broader political, economic, and cultural forces which have shaped the history of global health strategies; c) discuss the history of international health and development organizations and their changing roles in the development of global health strategies; d) undertake independent research and develop critical thinking and writing skills; e) orally communicate ideas and arguments about health and development.

Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	1) Introduction: Colonialism and Development 2) Plagues and Society 3) Ecological Change and the Political Economy of Hunger 4) Colonial Medicine and Chinese Bodies 5) The Imperial Origins of International Health 6) WHO, Postwar Development, and War on Disease 7) From Population Control to Family Planning 8) From Primary Health Care to Selective Primary Health Care 9) PHC and the Politics of International Development 10) Industrialization, Urbanization, and Disease 11) Structural Change and Health Care Reform 12) Return to the War on Disease: AIDS, Malaria, COVID-19 13) Neglected Epidemics																																																						
Teaching/Learning Methodology <i>(Note 3)</i>	The course will combine lectures, discussions of assigned readings, and student presentations. The reading materials will primarily consist of scholarly research in history and anthropology, supplemented by primary texts, documentaries or films for class discussions. The instruction for this course is conducted in Chinese; however, students will be assigned readings in both Chinese and English. Students are expected to participate actively in class discussions and complete assignments in a timely manner.

Total	100 %																																																						

	1. Attendance & Participation (20%): Assesses students' overall grasp of relevant knowledge and analytical skills, particularly their ability to analyze primary sources and present ideas. In order to engage in class discussions, students will need to carefully read assigned readings and attentively listen to peers. 2. Mid-term quiz (15%): Directly evaluates students' grasp of course themes. It will ensure a basic understanding of essential historical events and concepts. 3. Oral presentations (25%): Evaluates students' overall grasp of knowledge and skills acquired from lectures and readings. Provides opportunities for students to formulate questions, communicate interpretations of the readings, and actively participate in discussions. This assignment also lays the foundation for students to undertake independent research. 4. The final essay (40%): Evaluates students' appreciation of the information, concepts, and ideas from the subject. Provides an opportunity to practice their abilities in identifying topics, forming arguments, collecting and digesting primary and secondary source materials, and presenting ideas in a coherent and concise written form.	
Student Study Effort Expected	Class contact:	
	▪ lectures	26 Hrs.
	▪ tutorials	13 Hrs.
	Other student study effort:	
	▪ Readings	39 Hrs.
	▪ Writings	20 Hrs.
	▪ Discussions	8 Hrs.
	Total student study effort	106 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
