The areas of evaluation cover non-Chinese students’ language abilities, their understanding of Chinese language, literature and the inherent cultural phenomenon as manifested in their viewpoints and ways of expression. Students may use GenAI in assessment unless they have been told otherwise before the assessment. The work submitted for assessment must be students’ own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. Third-party materials (included AI-generated materials) used in the work must be properly referenced. Submitting third-party materials as their own work is an act of academic dishonesty and will lead to disciplinary actions. Departments and subject teachers have the discretion to request students to make an honour declaration for the authenticity of the work they submit for assessment. For the oral presentation, students are engaged with GenAI tools to enhance their proficiency in Mandarin, particularly in areas such as pronunciation, and intonation. Furthermore, through interaction with AI, students deepen their understanding of selected articles related to Chinese history, culture and society. This engagement helps to clarify any ambiguities related to vocabulary and cultural context, thereby improving their overall comprehension and involvement with the material.
