

Subject Description Form

Subject Code	CLC3241P (2019-20 onward) CBS3241P (2018-19 and before)
Subject Title	Professional Communication in Chinese
Credit Value	2
Level	3
Pre-requisite/ Co-requisite/ Exclusion	Pre-requisite / Co-requisite: Chinese LCR subjects (in Semester 2 of Year 3 or Semester 1 of Year 4)
Objectives	This subject aims to develop the language competence for professional communication in Chinese required by students to communicate effectively with various parties and stakeholders in regard to engineering-related project proposals and reports.
Subject Intended Learning Outcomes	Upon completion of the subject, and in relation to effective communication with a variety of intended readers/audiences in Chinese, students will be able to - plan, organize and produce professionally acceptable project proposals and reports with appropriate text structures and language for different intended readers - plan, organize and deliver effective project-related oral presentations with appropriate interactive strategies and language for different intended audiences - adjust the style of expression and interactive strategies in writing and speaking in accordance with different intended readers/audiences
Subject Synopsis/ Indicative Syllabus	- Project proposals and reports in Chinese - Planning and organizing project proposals and reports - Explaining the background, rationale, objectives, scope and significance of a project - Referring to the literature to substantiate project proposals - Describing the methods of study - Describing and discussing project results, including anticipated results and results of pilot study - Presenting the budget, schedule and/or method of evaluation - Writing executive summaries/abstracts and/or professional reports - Oral presentations of projects - Selecting content for audience-focused presentations - Choosing language and style appropriate to the intended audience - Using appropriate transitions and maintaining coherence in team presentations - Using effective verbal and non-verbal interactive strategies

Teaching/Learning Methodology	<u>Learning and teaching approach</u> The subject is designed to develop the students’ Chinese language skills, both oral and written, that students need to communicate effectively and professionally with a variety of stakeholders of engineering-related projects. It builds upon the language and communication skills covered in GUR language training subjects. The study approach is primarily seminar-based. Seminar activities include instructor input as well as individual and group work, involving drafting and evaluating texts, mini-presentations, discussions and simulations. The learning and teaching activities in the subject will focus on a course-long project which will engage students in proposing and reporting on an engineering-related project to different intended readers/audiences. During the course, students will be involved in: - planning and researching the project - writing project-related documents such as project proposals and reports - giving oral presentations to intended stakeholders of the project																							
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="3">Intended subject learning outcomes to be assessed</th></tr><tr><th>a</th><th>b</th><th>c</th></tr><tr><td>1. Project proposal and report in Chinese</td><td>60%</td><td>✓</td><td></td><td>✓</td></tr><tr><td>2. Oral presentation of project proposal and report</td><td>40%</td><td></td><td>✓</td><td>✓</td></tr><tr><td>Total</td><td>100%</td><td colspan="3"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The assessments will arise from the course-long engineering-related project. • Students will be assessed on written documents and oral presentations targeted at different intended readers/audiences. This facilitates assessment of students’ ability to select content and use language and style appropriate to the purposes and intended readers/audiences. • Students will collaborate in groups in planning, researching, discussing and giving oral presentations on the project. The written proposals will be individual work to ensure that students will be rigorously engaged in the application of language skills for the entire document. Students may use GenAI in assessment unless they have been told otherwise before the assessment. The work submitted for assessment must be students’ own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. Third-party materials (included AI-generated materials) used in the work must be properly referenced. Submitting third-party materials as their own work is an act of academic dishonesty and will lead to disciplinary actions. Departments and subject teachers have the discretion to request students to make an honour declaration for the authenticity of the work they submit for assessment.	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed			a	b	c	1. Project proposal and report in Chinese	60%	✓		✓	2. Oral presentation of project proposal and report	40%		✓	✓	Total	100%

1. Project proposal and report in Chinese	60%	✓		✓																				
2. Oral presentation of project proposal and report	40%		✓	✓																				
Total	100%																							

Student Study Effort Expected	Class contact:	
	▪ Seminars	26 Hrs.
	Other student study effort:	
	▪ Researching, planning, writing, and preparing the project	44 Hrs.
	Total student study effort	70 Hrs.
