

Subject Description Form

Subject Code	COMP5221
Subject Title	Software Project Management
Credit Value	3
Level	5
Pre-requisite/ Exclusion	Prerequisite: Nil Exclusion: COMP5220 Information Systems Project Management
Objectives	The objectives of this subject are to: 1. provide students with a systematic approach to initiating, planning, executing, controlling and closing a software project; 2. enable students to develop a basic understanding of the nine project management areas and the role of a typical project manager; 3. enable students to understand the best practices and techniques used in project management processes.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a) acquire a good understanding about the concepts and knowledge in software project management, leveraging emerging technologies for global challenges; b) properly apply tools, techniques, and skills for successful software project management in real-world scenarios, demonstrating critical awareness and integrity in making responsible decisions; c) work effectively with others as a team to achieve ambitious goals; and d) appropriately communicate all aspects of software project management to various stakeholders both verbally and in writing, fostering intercultural and interdisciplinary interactions.

Subject Synopsis/ Indicative Syllabus	• Project Management: Project conception; Project definition; Project Life Cycle; Principle of Software Development, Software Process Models; Roles and Responsibility of project manager. • Project Management Processes: Initiating, planning, executing, controlling, and closing. • Project management techniques: planning, organizing, communication channels, controlling, evaluating, reporting, costing, sizing, cost/benefit analysis, and earned value analysis. • Methods for project planning: Estimation of project size, schedule and cost. • Methods for project control: Checkpoints, Reviews, Software Quality, Change Management, Reporting, Issues management, Team building, High performance team. • Project Management Knowledge Areas: Integration Management, Scope Management, Time Management, Cost Management, Quality Management, Human Resource Management, Communication Management, Risk Management, Procurement Management.																																									
Teaching/Learning Methodology	Class activities including - lecture, tutorial, lab, workshop seminar where applicable
