

Subject Code	ENGL2002
Subject Title	English for Academic Communication
Credit Value	3
Level	2
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This subject is designed as a core English proficiency course to focus explicitly on developing students' language skills and general abilities in listening and speaking within the context of English for academic purposes (EAP). The subject is aimed at enabling students to communicate more fluently and confidently in English with each other as well as with other users of English such as lecturers and fellow students in an academic setting. Students will be given practice in developing both general and specific aspects of listening and speaking related to EAP such as taking lecture notes and giving academic oral presentations. The subject further focuses on encouraging students to take responsibility for their own language learning.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: Category A: Professional/academic knowledge and skills Develop English listening skills for managing academic study - identify and explore ideas through investigation of semantic relations in discourse; - understand meaning by using features such as sentence stress, intonation, and voice emphasis as clues to comprehension; - evaluate the importance of information in lecture discourse by understanding its overall structure and sub-sections; - evaluate spoken discourse critically by recognising speaker attitude and viewpoint;

	Develop English speaking skills for managing academic study e. make appropriate use of modulation, lexis, and communicative strategies in oral academic communication; f. recognise and apply effective verbal and non-verbal strategies in planning and delivering oral presentations; Category B: Attributes for all-roundedness g. display critical analytical thinking, including with the role of technological advancements in academic contexts; h. take responsibility for learning independently through planning for and executing a programme of self-access English language learning; and i. embark on life-long learning for continuous personal and professional development and improvement.
Subject Synopsis/ Indicative Syllabus	1. Listening to lectures for gist and specific information 2. Developing note-taking skills 3. Understanding conversation gambits and moves 4. Understanding oral presentation structure 5. Learning and applying verbal and non-verbal strategies in delivering oral presentations 6. Understanding and giving constructive self- and peer-feedback on oral performance 7. Developing independent language learning skills

Teaching/ Learning Methodology	The teaching and learning approach will be task-based, student-centred and interactive. There is a balance of individual effort and cooperative, interdependent learning. Academic texts and professional reports in audio-visual and print forms from diverse academic disciplines will be utilised to stimulate thinking and discussions. The subject, though focusing on developing competence in listening and speaking, also develops the skills of reading and writing for academic purposes. Course work includes speaking and listening tasks such as working in pairs and small groups on interactive group discussions, preparing and delivering oral presentations, listening and taking notes in seminars and lectures, as well as completing self-designed practice activities to be conducted independently in the Centre for Independent Language Learning (CILL) or at other relevant venues outside class. The independent language learning component involves students keeping an assessed self-study journal for most of the duration of the subject.
