

Subject Code	ENGL3011
Subject Title	Content Design for Social Media
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	None
Objectives	The objectives of this subject are to: 1. Understand the emerging role of social media as an important vehicle for promoting a culture of participation, interaction, persuasion, and influence where social networks, news, photos, blogs, and videos are used to harness collective intelligence and encourage active communication among users. 2. Learn analytical and content design skills related to social media that are essential to promoting the notion of influence and the gathering of valuable information pertaining to products, services, and brands in the increasingly competitive market. 3. Identify, plan, and align business objectives that leverage specific elements of social media programs to strategically reach target audience.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: <u>Professional/academic knowledge and skills</u> (a) define social media and understand the evolving needs and strategies to integrate elements of social media; (b) identify different types of social media and their social feedback cycles and how direct communication among consumers may provide opportunities and threats; (c) investigate and critically review the pros and cons of various social media channels and their effectiveness in creating different and multiple levels of influence and in promoting a participatory culture; (d) systematically analyse various social media options and align these options with marketing objectives. <u>Attributes for all-roundedness</u> (e) communicate effectively in project presentations and document design/reports; (f) learn independently to identify and solve problems; (g) collaborate with other team members for project design and development, while exhibiting leadership in a project team whenever designated or necessary; (h) think and reason in a critical and creative mind, especially in applying different social media technologies to extend the network value and its reach to consumers.
Subject Synopsis/ Indicative Syllabus	1. Introduction to social media and how it compares to traditional media, from centralised push marketing to

	participatory marketing, social media opportunities and threats, and elements of social media;									
	2. Analysing, planning, and managing social media strategy, including content design, platform selection, and audience analysis;									
	3. Introduction to the latest and future social media, particularly recent advancements in communication technologies, such as artificial intelligence, and their impacts on social media									
Teaching/Learning Methodology	This subject emphasises the design and analysis aspects of social media content and platform development. It is intended to equip the student with knowledge and practical experience on how to leverage social media as an important platform to promote many-to-many collaborative networking.									
	The lectures will be used to deliver course material that will be practised/reinforced through in-class discussion and case studies.									
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)							
			a	b	c	d	e	f	g	h
	Participation	20%					✓	✓		✓
	Individual Case Analysis	30%	✓	✓	✓	✓	✓	✓		✓
	Group Project	50%	✓	✓	✓	✓	✓		✓	✓
	Total	100 %								
	The assessment methods evaluate students’ understanding of the concepts and principles taught in the class, as well as equipping them with practical problem-solving skills and critical thinking.									
Individual case analysis encourages students to think and work independently, demonstrating their ability to critically analyse social media strategies, content, and effectiveness. Assessment for this component will be based on both a written report and an individual presentation.										
Group assignments in the form of projects will evaluate students’ ability to work collaboratively in a team and to design, develop, and present a social media strategy. Apart from submitting a social media content design, students will also deliver a presentation to show their ability to effectively communicate their design and ideas to the class. This assessment will include both individual and group components, which ensure that each student is evaluated on their contribution to the project, presentation skills, and overall understanding of the work.										

Student study effort expected	Class Contact:	
	Lecture	39 hours
	Tutorial/Lab	0 hours
	Other student study effort:	
	Worksheets, short papers, project	63 hours
	Total student study effort	102 hours
