

Subject Code	ENGL4005
Subject Title	English for Science and Technology
Credit Value	3
Level	4
Pre-requisite / Co-requisite/ Exclusion	None
Objectives	This subject aims to equip students with the necessary linguistic knowledge and strategies to: (1) understand the discourse features of scientific and technical texts; (2) produce reader-oriented, engaging, and persuasive scientific and technical texts; and (3) achieve clarity, accuracy, conciseness, and overall effectiveness in writing for science and technology.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: Category A: Professional/academic knowledge and skills - understand and analyse linguistic and discourse features of scientific and technological texts; - develop and produce scientific and technological texts with appropriate linguistic and discourse features; - guide readers through a text and engage with them effectively using the appropriate choice of linguistic strategies. Category B: Attributes for all-roundedness - extend and enhance strategies for learning autonomously and collaboratively; - increase their global outlook and an awareness of cultural diversity constructed through English for science and technology texts.
Subject Synopsis/ Indicative Syllabus	- Linguistic features of scientific and technical texts (e.g., vocabulary, syntax, and organization) - Discourse features of scientific and technical texts for specific communicative purposes - Critical and creative writing of various types of scientific and technical texts, including abstracts and summaries, procedural texts, scientific editorials, technical reports, and popular science articles

Teaching/ Learning Methodology	The learning and teaching will be in the form of task-based, interactive seminars in classrooms and computer laboratories. Students are exposed to various types of scientific and technical texts to investigate their linguistic features with the support of analytical computer software, and to produce scientific and technical texts by themselves.																																													
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1"> <tr> <th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr> <tr> <th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr> <tr> <td>1. Presentation</td><td>30%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>2. Technical Report</td><td>35%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>3. Popular Science Article</td><td>35%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>Total</td><td>100 %</td><td colspan="5"></td></tr> </table> The assessment will be based on a variety of activities, which demonstrate student understanding of specialised discourse and critical thinking, as follows: 1) a presentation on the analysis of the linguistic and discourse features of scientific and technical texts on a topic of their own choice; 2) an individually assessed task for producing a technical report; and 3) writing a popular science article on a social issue.
