

The Hong Kong Polytechnic University

Subject Description Form

Please read the notes at the end of the table carefully before completing the form.

Subject Code	ENGL4028
Subject Title	Integrated Double Major Capstone Project
Credit Value	6
Level	4
Pre-requisite/ Co-requisite/ Exclusion	ENGL3002 Research Methods for Language Studies
Objectives	The Integrated Double Major Capstone Project provides an arena for students to demonstrate their creative ability and to integrate all they have learnt during the first three years of the double major programme through a systematic investigation of issues related to linguistics, translation and interpreting, bilingual corporate communication, or the English language in professional contexts. Building on knowledge students have acquired from Research Methods for Language Studies and other relevant subjects, students will carry out an individual research project under the guidance of a primary supervisor and a secondary supervisor belonging to the student's primary major and second major respectively.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: Category A: Professional/academic knowledge and skills a. gain systematic knowledge about the chosen research topic through reading literature and discussing with the supervisors; b. identify and analyse language-related issues systematically and logically; c. design and accomplish an original project within the area of study specified by the programme; d. demonstrate a high level of professional communicative competence through a final project report, presenting research results in a clear, effective, and convincing manner. Category B: Attributes for all-roundedness

	e. develop the ability to work critically, learn independently, and find/integrate information from different sources required in solving real-life problems; f. exercise sound judgement and develop intellectual curiosity; g. display good skills in time and self-management; h. apply problem-solving skills to careers, personal development, and life-long learning.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	With advice from the Project Supervisors, students select, justify, and apply techniques learnt from Research Methods for Language Studies and other related subjects to design, conduct, and produce an Integrated Double Major Capstone Project for submission by the end of Semester 2, Year 4. Detailed guidelines for conducting the Integrated Double Major Capstone Project will be made available to students at the beginning of Semester 1, Year 4. The Integrated Double Major Capstone Project final report may consist of a 6,000-word dissertation or an alternative medium/format project output (e.g., poster with presentation, advertising campaign, video, short story) accompanied by a 500-to-1000-word written document. In conceptualising and designing the project, students can consider one of the following directions: 1. Students can follow usual approaches to designing and conducting a research project, applying skills and knowledge learnt from the subject ENGL3002 Research Methods for Language Studies and other subjects. 2. Students may wish to consider conducting the project in the context of professional workplaces. For example, they can design and conduct the project at the organization where they completed their Work-Integrated Education (WIE) placements or Service-Learning course, with permission from their workplace supervisors. In this case, students are encouraged to consider designing a project for solving a practical problem related to the actual workplace/profession/industry/community.
Teaching/Learning Methodology <i>(Note 3)</i>	Integrated Double Major Capstone Projects are coordinated by the Project Coordinator. Each student will be assigned a Primary Project Supervisor and a Secondary Project Supervisor who belong to the student's primary major and second major respectively. Students will take two semesters to complete the subject. The teaching/learning activities include regular project meetings with the Supervisors, guided study of project materials, independent project development work, and other project management tasks.
Assessment Methods in Alignment with	

Intended Learning Outcomes (Note 4)	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)							
			a	b	c	d	e	f	g	h
	1. Capstone project final report	70%	✓	✓	✓	✓	✓	✓	✓	✓
2. Semester 1 Capstone progress report (including the learning-to-learn component, 2.5%)	15%					✓	✓	✓		
3. Semester 2 Capstone progress report (including the learning-to-learn component, 2.5%)	15%					✓	✓	✓		
Total	100 %									
The Integrated Double Major Capstone is completed over the course of two semesters. During each semester students must: 1) discuss their progress with their supervisors a minimum of three times and 2) submit the Capstone Progress Report (with supervisors’ signatures) before the end of the semester. The supervisors will provide confidential marks on each of the Capstone Progress Reports (due at the end of Semester 1 and Semester 2, respectively) that will in total contribute 30% of the student’s overall grade on the Integrated Double Major Capstone Project. If a student fails to discuss their progress with their supervisors a minimum of three times during each semester they are enrolled in the Capstone, or if the supervisors’ comments via the Capstone Progress Report indicate that the student is not making satisfactory progress, then the student may receive a score of zero on that Capstone Progress Report. As this subject intends to measure the integrated knowledge and skills of the student, the Integrated Double Major Capstone Project will be assessed by the student’s assigned Supervisors. 30% of the Supervisors’ mark is based on the Supervisors’ holistic evaluation of the student’s performance throughout the project as indicated via the two Capstone Progress Reports. Assessment procedures are described in detail in the Integrated Double Major Capstone Project Guidelines.										

	It is expected that students will be able to integrate what they have learnt from the double major programme to produce a high-quality project. This project will not only contribute to the fulfilment of the subject's intended learning outcomes but also to the students' long-term development of their professional and academic knowledge and skills, as well as a variety of general attributes, especially their ability to learn independently, think critically and analytically, and solve real-world problems with what they have learnt from the programme.	
Student Study Effort Expected	Class contact:	
	▪ Consultation	10 Hrs.
	▪ Independent research	200 Hrs.
	Total student study effort	210 Hrs.

Additional papers and books relevant to the student's specific project topic will be identified by the student or recommended by the Supervisors, and detailed guidelines will be provided to the student at the beginning of the project period.
--	---

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
