

Subject Code	ENGL5042
Subject Title	Digital Media and AI Strategies for Professional Communication
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	N/A
Objectives	The objectives of this subject are to: 1. Gain knowledge of issues, concepts, and emerging trends in digital media and artificial intelligence (AI), focusing on their implications and applications for professional communication. 2. Develop an understanding of the role and the analysis related to digital media and AI strategy in shaping personal and organisational branding, as well as managing reputation. 3. Formulate strategic digital media recommendations to engage and reach target audiences effectively.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: Professional/academic knowledge and skills a) Demonstrate a solid understanding of key issues, concepts, and trends in digital media and AI, as well as their application to professional communication contexts; b) Analyse and evaluate the role and impact of AI and digital media strategies on personal and organisational branding and reputation management; c) Develop actionable digital media strategies, including identifying opportunities and planning campaigns to strategically engage target audiences; Attributes for all-roundedness d) Exhibit adaptability and awareness of the evolving AI and digital media landscape to respond to emerging trends and challenges in a professional context; e) Communicate effectively and persuasively in individual and team-based projects, presentations, and written reports; and f) Think and reason in a critical and creative mind, especially in creating and implementing digital media strategies.
Subject Synopsis/ Indicative Syllabus	1. Introduction to the digital media and AI landscape 2. Foundations of professional communication: social, marketing, and public relations

	3. Developing and evaluating digital media strategies: - objectives and tactics identification - understanding target audience - content strategy - platform strategy - data analytics and performance evaluation 4. Emerging trends and technologies in digital media and AI																																														
Teaching/Learning Methodology	This subject integrates theory and practice to equip students with a comprehensive understanding of digital media and AI strategy for professional communication. It incorporates lectures, in-class discussions, and case studies to provide both foundational knowledge and real-world context. Active participation is integral, with students engaging in group activities and discussions. This subject also features project-based learning, as students are required to conduct individual analyses and develop group digital media strategies to prepare students to address real-world challenges effectively.																																														
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th>f</th></tr><tr><td>1. Participation</td><td>10%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>2. Individual Analysis</td><td>40%</td><td>✓</td><td>✓</td><td></td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>3. Group Project</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>Total</td><td>100 %</td><td colspan="6"></td></tr></table> The assessment for this course consists of three key components: participation, an individual analysis and a group project. The participation component will evaluate students’ engagement, initiative, and active involvement in discussions, case studies, and other subject activities. For the individual analysis, students are required to identify an individual or an organisation and critically evaluate the effectiveness of their existing digital media strategy. This involves writing a detailed report and presenting their findings. The group project requires students to collaborate in developing effective digital media strategies for an individual or an organisation. Apart from developing a written proposal, students will have presentations of their proposed digital media campaign. These assessments ensure students can critically analyse existing strategies, develop effective digital media strategies, work collaboratively to create innovative solutions, and effectively communicate their ideas through professional presentations and reports.
