

Subject Code	ENGL5045
Subject Title	Language teaching in practice with AI
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	None
Objectives	The subject provides structured opportunities for students to explore: a) the applications of artificial intelligence (AI) tools in English language teaching, focusing on practical integration; b) the evolving role of teachers in AI-assisted classrooms and their ability to customise or develop AI tools for pedagogical purposes; and c) hands-on strategies for effectively utilising AI to enhance teaching and learning experiences.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a) Demonstrate understanding of AI technologies relevant to English language teaching. b) Integrate AI tools effectively into lesson planning and delivery. c) Critically evaluate the pedagogical affordances and limitations of AI tools. d) Develop and train simple AI tools to support English language learning. e) Reflect on the role of teachers in an AI-assisted classroom and articulate their professional growth.
Subject Synopsis/ Indicative Syllabus	This subject provides a comprehensive overview of AI's role in English language teaching, covering theoretical underpinnings and practical applications: 1. Introduction to AI in English Language Teaching: Definitions, applications, and trends in AI-assisted learning. 2. AI and Language Learning Theories: Connections between SLA theories and AI-driven tools. 3. AI for Skills Development: Applications in vocabulary, grammar, speaking, listening, reading, and writing. 4. AI and Performance Assessment: Designing and evaluating AI-driven formative and summative assessments. 5. Role of Teachers in the Age of AI: Developing and customising AI tools for language teaching. 6. Ethical and Practical Considerations: Challenges, data privacy, and balancing AI and human roles in teaching. 7. Hands-On Applications: Workshops on AI tools use.

Teaching/Learning Methodology	The course employs a blended learning approach combining: 1. Seminars: Overview of theoretical and practical aspects of AI in ELT. 2. Hands-On Workshops: Practical training with AI tools to design and deliver language lessons. 3. Mini Lessons: Student-led teaching sessions integrating AI tools. 4. Reflective Practice: Written reflections to deepen understanding of AI's role in teaching.																																													
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr> <tr> <th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr> </thead> <tbody> <tr> <td>Class participation</td><td>20</td><td>✓</td><td></td><td>✓</td><td></td><td>✓</td></tr> <tr> <td>AI-integrated mini lesson</td><td>40</td><td></td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>Reflection</td><td>40</td><td>✓</td><td>✓</td><td>✓</td><td></td><td>✓</td></tr> <tr> <td>Total</td><td>100</td><td colspan="5"></td></tr> </tbody> </table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: • Class participation: Active engagement in discussions and workshops demonstrates understanding and critical thinking (ILO a, c, e). • AI-Integrated mini lesson: Students design and deliver lessons using AI tools, assessing their practical application skills and creativity (ILO b, c, d, e). • Reflection essay: Students critically analyse their learning and articulate insights into integrating AI in their professional practice (ILO a, b, c, e). Student Study Effort Expected	Class contact:																																													
	▪ Seminars and workshops					39 Hrs.																																								
	Other student study effort:																																													
	▪ Independent study					58 Hrs.																																								
	▪ Group work and mini lesson preparation					43 Hrs.																																								
	Total student study effort					140 Hrs.
