

Subject Code	ENGL5047
Subject Title	Applying AI in Writing for Specific Purposes
Credit Value	3
Level	5
Pre-requisite/ Co-requisite/ Exclusion	N/A
Objectives	This course provides a hands-on, practical exploration of GenAI tools in writing. It equips students with the skills to effectively utilize AI for various writing tasks, critically analyze AI-generated texts, and reflect on the implications of AI in writing pedagogy. The focus is on practical implementation, with occasional references to communication, discourse and cognitive theories.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Apply AI tools effectively in different writing contexts (academic, creative, and professional). - Engineer prompts to optimize AI-generated text quality. - Critique and refine AI-generated writing for coherence, cohesion, and intellectual rigor. - Evaluate AI's role in professional writing and writing pedagogy, considering ethical and practical implications. - Lead discussions and workshops on AI-assisted writing strategies.
Subject Synopsis/ Indicative Syllabus	- Introduction to AI in Writing – Overview of GenAI tools, capabilities, and limitations. - AI Tool Selection – Matching AI tools to writing tasks. - Prompt Engineering – Strategies for effective AI input. - AI-Assisted Writing Process – Drafting, revising, and enhancing text with AI. - Critiquing AI-Generated Writing – Identifying strengths, weaknesses, and biases. - AI Feedback in Writing – Reflecting on the accuracy and usefulness of AI feedback. - Collaborative AI Writing – Using AI in group writing tasks. - AI and Writing Pedagogy – Impact on teaching and learning writing. - Researching AI-Assisted Writing – Identifying gaps in AI-driven writing research.
Teaching/Learning Methodology	- Workshops & Hands-on Activities: Emphasis on AI tool experimentation. - Student-led Seminars: Facilitating discussions on AI-assisted writing. - Collaborative Writing Tasks: Group projects using AI tools. - Case Studies & Critical Reflections: Analysis of AI's impact on writing pedagogy.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)				
			a	b	c	d	e
	1. Class participation	20	✓	✓	✓	✓	
	2. Writing portfolio	40	✓	✓	✓	✓	
	3. Student-led seminar	40			✓	✓	✓
	Total	100 %					
The selected assessment methods are closely aligned with the practical, skill-based focus of the course. - Class participation (20%) assesses students’ engagement in workshops, hands-on activities, and discussions, providing continuous opportunities for students to apply AI tools, engineer prompts, critique AI outputs, and reflect on AI’s role in writing pedagogy (ILO a–d). - Writing portfolio (40%) requires students to demonstrate their ability to apply AI tools across different writing contexts, optimize AI outputs through prompt engineering, and refine AI-generated texts for coherence, cohesion, and intellectual rigor (ILO a–d). It encourages iterative practice, critical reflection, and tangible improvement in writing quality. - Student-led seminar (40%) assesses students’ ability to synthesize their learning and lead professional discussions about AI-assisted writing strategies (ILO c–e). It also develops their skills in critically evaluating AI’s pedagogical applications and communicating best practices to peers. These assessments are practical, cumulative, and encourage the development of transferable skills essential for the professional application of AI in writing education.							
Student Study Effort Expected	Class contact:						
	▪ Lecture					26Hrs.	
	▪ Seminar					13Hrs.	

	Other student study effort:	
	▪ Independent study	45Hrs.
	▪ Assignments	28Hrs.
	Total student study effort	112Hrs.
