

Subject Description Form

Subject Code	AF3212
Subject Title	Fintech Application for Accounting and Finance Professionals
Credit Value	3
Level	3
Normal Duration	1-semester
Pre-requisite / Co-requisite/ Exclusion	Pre-requisite: Financial Accounting 1 (AF2108) and Business Finance (AF3313)
Objectives	The subject provides business students with an understanding of the application of technology and analytics in accounting and finance from the managerial perspective. It helps students to identify the opportunities and challenges associated with the application of latest technology in accounting and finance. It enhances students' ability to access the impacts (including ethics) of technology on the accounting and financial industries. It equips students with the ability to communicate new technologies in business context. Such skills and knowledge help students to make an immediate contribution to the workplace, and to facilitate the process of continuous professional development.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - understand the application of new technology such as Blockchain and Big Data analytics; - identify the opportunities and challenges that new technology brings to the accounting and financial industry; - access the business implications of new technology for the accounting and finance industry and their impacts on markets, institutions and individuals; and - identify the ethical issues associated with the application of new technology in accounting and finance.
Subject Synopsis/ Indicative Syllabus	Introduction of latest technology application in accounting and finance - Technology Transformation - Opportunities and Challenges in Emerging Economics - Technology Hubs

	Blockchain, Payments and Cryptocurrencies • Blockchain application • Mobile Money and Fast Payment Solution • Real-Time Gross Settlement (RTGS) • Cryptocurrencies Digital Finance and Alternative Finance • Digitization of Financial Services • Peer to Peer (P2P) Lending • Securitised Token Offerings Big Data for Financial Institutes • Building up a Big Data Platform • Generating customer experiences from Analytics • Ethical issues of Big Data Analytics • Case Studies of financial companies using Big Data Technology Application in Banking • Payments and Point of Sales (POS) Innovation • International FX Payments • Predictive Algorithms to build Innovative Online Banking Solutions • Digitizing Wealth Management Operations Technology Application in Capital and Investment • Crowdfunding • The Digital Investment Space • Crowdsourcing a Hedge Fund Technology Application in Accounting • AI Accounting • Robotic Process Automation - invoice management, credit control, cash-flow forecasting, and reconciliations • Cloud Accounting, Cloud Solution
--	--

	- Electronic Document Management System - Real-time business intelligence - Dashboard Reporting - Invoice Funding Technology Application in Auditing - AI Audit - Audit Data Analytics - Fraud Detection Blockchain Implications on Accounting and Auditing - Blockchain Implications on Accounting - Blockchain Implications on Auditing - Fintech and New Tech – Risk and Opportunities for CPA. Company Visits						
Teaching/Learning Methodology	A three-hour seminar will be conducted each week to provide students with a conceptual framework to understand the application of latest technology in accounting and finance. Students will be assigned and assessed with quizzes, individual written report and group assignment to further develop their critical thinking, teamwork, and presentation skills. Lectures will incorporate blended learning approaches, including flipped videos and outside classroom activities in order to create an active learning environment.						
Assessment Methods in Alignment with Intended Learning Outcomes							
	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)				
			a	b	c	d	
	1. Class participation	10%	√	√	√	√	
	2. Quizzes	20%	√	√	√	√	
	3. Group presentation and report	40%	√	√	√	√	

	4. Reflective journal/report	30%	√	√	√	√		
	Total	100 %						
Student Study Effort Expected	Class contact:							
	▪ Seminars					39 Hrs.		
	▪ Other student study effort:							
	Self study and homework preparation					72 Hrs.		
	▪ Total student study effort					111 Hrs.
