

Subject Code	AF5946/LGT5946/MM5946
Subject Title	Asset and Wealth Management Project
Credit Value	6
Level	5
Normal Duration	Two consecutive semesters
Pre-requisite/ Co-requisite/ Exclusion	Pre-requisite: Completion of at least 4 compulsory core subjects and the Academic Integrity and Ethics (AIE) subject in the programme. ----- Exclusion: Asset and Wealth Management Project (AF5946/LGT5946/ MM5946)
Objectives	This course offers students the unique opportunity to integrate theoretical knowledge with practical application through an individual assignment that entails extensive investigation and culminates in a comprehensive report. It is specifically designed to enhance students' abilities to analyse and solve real-world business problems in an ethical way, fostering experiential learning within an authentic business environment under the guidance of workplace supervisors and mentors. Qualitative and Quantitative research methodologies (such as interview, survey, and empirical analysis of the collected information and data) may be adopted to solve the complicated real-world problems in the asset and wealth management industry. Moreover, students will actively engage in one-on-one meetings with an academic supervisor to discuss and refine their project, which can manifest as a specific project. This subject contributes to Programme Outcome(s): 4 (Effective Communication and Collaboration); and 5 (Lifelong Learner with Continuous Professional Development) for the MSc in Asset and Wealth Management.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a) Acquire practical knowledge and skills b) Gain a global perspective c) Utilize research methodologies to solve real-world problems in asset and wealth management industry, and present and communicate with industry leaders in an efficient way.

Subject Synopsis/ Indicative Syllabus	There is no formal syllabus. Students are required to carry out their individual projects, under the supervision of their supervisors, through a series of activities that address asset and wealth management-related topics and issues in real-world settings and contexts (e.g. internships, consultancy projects, etc.). The students may use various research methodologies (such as interview, survey, and empirical analysis of the collected information and data) to solve practical problem in asset and wealth management industry.																																																												
Teaching/Learning Methodology	Students are then required to carry out their 6-credit projects individually in consultation with their supervisors.																																																												
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th></th><th></th><th></th></tr><tr><td>Continuous Assessment*</td><td>100%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>1. Through qualitative and quantitative methods, students will develop solutions and enhance communication skills. Regular meetings with a supervisor will refine the project, culminating in a comprehensive report and presentation for industry leaders. This initiative contributes to Programme Outcomes 4 and 5, fostering practical skills, global perspectives, and effective communication for ethical decision-making in real-world business scenarios within the MSc in Asset and Wealth Management program. The proposal is around 3000 words. 	The Presentation highlights the integration of theoretical knowledge with practical application in a Family Office or Digital Asset Management case study, following the proposal. Through qualitative and quantitative research methods, students address sector challenges, develop solutions, and enhance communication skills. The culmination includes a comprehensive report and a presentation for industry leaders, showcasing insights and recommendations. The Reflective Report serves as an introspective account of learning experience through independent projects. Students will undertake a series of activities addressing asset and wealth management-related topics and issues in real-world settings and contexts (e.g. internships, consultancy projects, etc.). In this report, you will address the following aspects: the host organization, the tasks undertaken during the project, the connections between your university studies and the tasks performed, and the ways in which the learning activities have enhanced your employability skills. The students are required to give a final presentation and provide a reflective report. The final grade would be determined by the instructors to ensure compliance with the University's assessment requirements, and the industry leaders would provide insight and feedback to the students' projects. Feedback is given to students immediately following the discussions. To pass this subject, students are required to obtain Grade D or above in the overall subject grade.	
Student Study Effort Expected	Class contact:	
	▪ Discussion with project supervisor	28 Hrs.
	Other student study effort:	
	▪ Self-study	230 Hrs.
	Total student study effort	258 Hrs.
