

Subject Description Form

Subject Code	ITC514
Subject Title	Sourcing & Logistics
Credit Value	3
Level	5
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject examines a firm's global sourcing and distribution strategies, and relates them closely to the corporate and marketing policy. The key considerations in global sourcing and logistics will be discussed and analyzed to enhance the managerial sourcing decisions and logistic system design.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: 1. Conceive strategies of sourcing and logistics in improving a firm's competitive position in the marketplace. 2. Measure and evaluate the key factors involved in sourcing and logistics performance. 3. Identify and solve the issues of design, implementing and monitoring in the sourcing and distribution activities. 4. Analyze and manage procurement, distribution policies, and facility location planning in an enterprise.
Subject Synopsis/ Indicative Syllabus	1. <u>Sourcing Decision</u> An analysis of the global sourcing trend and production location pattern of clothing products. An evaluation of the determinants in location decisions and the relevant supply management system. 2. <u>Distribution Decision</u> Analysis of the integrated approach to total physical distribution management and the formulation and implementation of distribution strategies in textile and clothing industries. Evaluation and management of distribution information systems. 3. <u>Strategic Issues in Logistics Management</u> Strategic planning in in-bound and out-bound logistics for sourcing, production and distribution of the clothing products. Building of in-house logistics models for clothing firms. Critically evaluate

	various planning models (such as Just-in-time, Material Requirement Planning, and Distribution Requirement Planning) in an integrated logistics system.						
Teaching/Learning Methodology	This subject comprises lectures and workshops. Students are required to examine contemporary issues in the areas of sourcing and logistics of the fashion industry, and have their opinions and experiences shared in the lectures and workshops. Class activities will involve group discussions of real-life cases. Guided readings will be suggested for private study to complement the class.						
Assessment Methods in Alignment with Intended Learning Outcomes (Please note the “Use of GenAI for the Assessment”)	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed				
			1	2	3	4	
	1. Coursework						
	a) Assignment	25%	✓	✓	✓	✓	
	b) Project	25%	✓	✓	✓	✓	
2. Examination	50%	✓	✓			✓	
Total	100%						
To pass this subject, students are required to obtain Grade D or above in BOTH the Coursework and Exam components.							
<u>Important note:</u> The materials submitted for this assessment must be the student’s own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. Submitting GenAI-generated materials as students’ own work or part of their work is an act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.							
Student Study Effort Expected	Class contact:						
	▪ Lecture			27 Hrs.			
	▪ Seminars			6 Hrs.			
	▪ Workshops			6 Hrs.			
	Other student study effort:						
	▪ Assignment			18 Hrs.			
	▪ Term paper			30 Hrs.			

	▪ Reading	48 Hrs.
	Total student study effort	135 Hrs.
