

Subject Description Form

Subject Code	ITC515
Subject Title	Fashion Retailing
Credit Value	3
Level	5
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject aims to provide students with the concepts, theories, strategies and trends that impact the retailing industry. Students are expected to attain an integrated understanding of fashion retailing within a global environment by critically comparing and evaluating the different relevant strategic and operational management systems and selecting and applying the most appropriate ones within specific fashion retail businesses.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: 1. Apply the various fashion retail management operations, such as retail organisation and store planning and the interrelated role of merchandising planning and buying in a global fashion retailing business in an integrative manner. 2. Critically evaluate different fashion retail marketing mix strategies and choose and apply the most appropriate to a global fashion retail business. 3. Evaluate recent trends and strategies in fashion retailing, and select and apply the best for a specific global fashion retailing business. 4. Describe the basis of competitive advantage in a global environment and develop and implement a plan to provide a competitive advantage within such an environment. 5. With an open mind, to critically address and solve, individually and/or as a valuable team member, issues and problems in an international fashion retailing business, demonstrating an awareness of, and sensitivity to, cultural, social and environmental requirements prevailing in different countries and an ability to evaluate and embrace new developments and trends and ways of thinking.
Subject Synopsis/ Indicative Syllabus	1. <u>Organizational Structures of the Fashion Retailing Industry</u> Types of retail institutions, retail organizations and structure and multi channel formats.

	2. <u>Sustainable Competitive Advantages and Strategies</u> To identify new markets, consumer behavior and needs, trends and technologies to create sustainable competitive advantages; to further evolve business modes of operations to enhance company effectiveness and success. 3. <u>Merchandise Management</u> Merchandising strategies, formats and processes, planning and implementation. 4. <u>Retail Location Analysis</u> Trading area analysis, site selection, location planning practices and e-stores. 5. <u>Store Layout</u> Store layout planning, space allocation, store atmospherics and visual merchandising. 6. <u>Communications</u> Communications strategies, elements of the communication mix, new approaches and technology. 7. <u>Omni-channel Retailing</u> Effectiveness of omni-channel retailing, elements of creating seamless operations among different channels.																																															
Teaching/Learning Methodology	The teaching and learning approach will include lectures, tutorials and case studies. Tutorials and case studies are student centered in the form of group projects, presentations, and interactive discussions. Guided readings of subject textbooks, journal articles and consumer/business periodicals will be suggested for private study to enrich students’ depth of knowledge of this subject. Guest speakers from the fashion retailing industry may be invited to talk to students on appropriate topics.
