

Subject Description Form

Subject Code	ITC525
Subject Title	International Fashion & Textile Design
Credit Value	3
Level	5
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject aims to give an insight into the creative side of the international fashion and textile design industry. Specifically, the objectives are: 1. to provide an understanding of the global fashion trends and requirements; 2. to give an overview and appreciation of the polarity between the creators, designers and manufacturing and the resulting fashion products; 3. to explore the application of design elements and principles in line and collection planning; 4. to analyze the connection between the design process and development within the fashion and textile markets; and 5. to develop a critical analytical understanding towards the initial design concept in respect of commercial and consumer demands, market forces and socio-cultural diversity that may impact upon a product within particular localities of the fashion world.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: 1. Identify the various global fashion trends and requirements. 2. Examine the design process, from conceptual realization to prototype and collection development, being practiced in the international fashion industry. 3. Assess critically design decisions on specific international fashion and textiles industries. 4. Integrate and apply the knowledge to explore design problems of the various fashion markets.

Subject Synopsis/ Indicative Syllabus	1. <u>Introduction to Fashion Trends</u> The macro perspective, its meaning and background. An exploration of the issues and fundamental concepts of trend development. 2. <u>From Design Concept</u> An exploration of the design concept development in the creative industry. The outcome that links to environmental and cultural influences; as well as the boundaries that imposes on the designers by such issues. 3. <u>Mass Market and High Fashion</u> The trickle-up and trickle-down theory. How does the mass market select high fashion trends that consumers can identify with, where have designers taken their inspiration from and is high fashion important every facet of the garment industry? 4. <u>Lifestyle Branding</u> Diversification into new markets over recent years has given fashion and textile designers and stylists more scope. An analysis of factors impacting upon such diversification into areas such as the home furnishings markets, interior decoration, cosmetic and car industries. 5. <u>Technology Unleashed</u> An exploration of the product development process and changes that are necessary to accommodate business and technology in today’s fashion world.																																	
Teaching/Learning Methodology	This subject consists of lectures, seminars and outside visits. Lecturers will be supplemented by the use of industry case studies and project work. Seminars will be student-centred in the form of group presentation and discussion, in concentrated groups; such seminars will be intensively focused. Guest speakers may be invited to present on specific topics on contemporary issues relating to current global fashion and styling directions.																																	
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed</th></tr><tr><th>1</th><th>2</th><th>3</th><th>4</th><th>5</th></tr><tr><td>1. 2. Project Work	80%			✓	✓	✓																												
Total	100%																																	

	A comprehensive project, which includes literature research, trend investigation, and open presentation, is employed to assess the overall earning outcomes. The materials submitted for all assessment must be the student's own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. However, students could utilise various media and technologies such as GenAI to assist with design research in the preliminary stage. They are required to declare the use of GenAI in their work if applicable. Submitting GenAI-generated materials as students' own work or part of their work without declaration is an act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.	
Student Study Effort Expected	Class contact:	
	▪ Lecture	27 Hrs.
	▪ Seminars	12 Hrs.
	Other student study effort:	
	▪ Assignments	30 Hrs.
	▪ Self-study	36 Hrs.
	Total student study effort	105 Hrs.
