

Subject Description Form

Subject Code	ITC544
Subject Title	Design Collection Preparation
Credit Value	3
Level	5
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject aims to enable students to consolidate their intended field of study and personal design practise to clarify a personal approach to their final major project. With the range of workshops, critical thinking and creative awareness skills generated throughout the first semester, students will work on a physical design proposal to define their intended market / consumer. The proposal will consist of rough prototypes, sketches and design development. In addition, the subject will place strong emphasis on primary research, created using various tools with inclusive use of GenAi.
Intended Learning Outcomes	Upon completion of the subject, students will: 1. Apply creative, intellectual and reasoning skills to validate a body of unique and innovative practise. 2. Demonstrate and apply knowledge and investigation gained from previous units to develop an original proposal and body of work. 3. Acquire an informed and rational global perspective and approach to redefine the fashion industry, its cultures and philosophy. 4. Communicate effectively and professionally (in physical and verbal formats) within the context of a contemporary fashion and textile design industry.
Subject Synopsis/ Indicative Syllabus	1. Fashion and Aesthetics Evaluation of fashion in the light of different schools of aesthetics and design movements, and their influences on fashion. 2. Consolidation of Design Ideas / Research Research and development of personal design thinking and process, uncovering new ideas and inspiration to encourage originality of thought. 3. Visualization and Effective Design Communication Organization of design ideas / experimental prototypes and visual imagery into a cohesive format, to facilitate clear and professional communication.

	4. Visualisation and Presentation Creation of design concepts, theme, fabric and consumer. Deployment of suitable visualisation skills and techniques to produce an effective personal design statement.																																						
Teaching/Learning Methodology	The subject will be delivered in a studio based environment, with emphasis placed on student-centred development and close interaction between tutor and students to promote independent thinking and design creativity.																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed</th></tr> <tr> <th>1</th><th>2</th><th>3</th><th>4</th><th></th></tr> </thead> <tbody> <tr> <td>Body of work</td><td>80%</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr> <tr> <td>Presentation</td><td>20%</td><td></td><td></td><td></td><td>✓</td><td></td></tr> <tr> <td>Total</td><td>100%</td><td colspan="5"></td></tr> </tbody> </table> Students will submit individual project work and give a presentation at the end of the course. This assigned project is to assess each student's ability to develop their initial design practice within their personal route of specialism.
