

Subject Description Form

Subject Code	ITC583
Subject Title	Current Technology in the Fashion Industry
Credit Value	3
Level	5
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject provides students an overview of the fashion industry from the perspective of product and production. To include topics in fashion technologies evolved in the recent decade, the students will be able to understand the needs and market trend of the fashion industry.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: 1. identify technologies, materials and design strategies developed in recent year. 2. perform analysis on impact of technological development on the fashion industry 3. refine problem solving skills and broaden international outlook 4. further develop inter-personal skill and teamwork ability
Subject Synopsis/ Indicative Syllabus	1. Materials The applications of nano and smart technologies in the fashion industry for modification of fabric properties. Functions of electronic, photonic and interactive materials. 2. Smart and functional textiles Structures and functions of electronic textiles; light-emitting and chromic fabrics; nano-fibers and functional finishing. 3. Apparel design for functions Wearable technology; apparel for monitoring activities and health; apparel for active heating and cooling; apparel for communications. 4. Processing Non-traditional garment assembly
Teaching/Learning Methodology	The subject matter is mainly delivered by lectures supported by self-study. Student centred tutorials provide more interactive learning. The subject matters will be reinforced by group discussions, small projects and critics.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed			
			1	2	3	4
	1. Course work					
	(a) individual project	20%	✓	✓		✓
	(b) group project	20%	✓	✓	✓	✓
	(c) presentation	10%	✓	✓	✓	
	2. Examination	50%	✓	✓	✓	
	Total	100 %				
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:					
Student Study Effort Expected	Class contact:					
	Lecture			10 Hrs.		
	Tutorial, presentation and critics			15 Hrs.		
	Studio/laboratory			14 Hrs.		
	Other student study effort:					
	Assignments			36 Hrs.		
	Self-study			30 Hrs.		
	Total student study effort			105 Hrs.
