

Subject Description Form

Subject Code	ITC6000A
Subject Title	Research versus Creation in Art & Design
Credit Value	3
Level	6
Pre-requisite / Co-requisite / Exclusion	Nil
Objectives	The subject intends to elucidate research students the differences between the concept, content, methodology and formats of deliverables of doctoral research in art & design and that of other fields of research. Prior successful cases will be cited to expound the nature of this unique type of doctoral research which is becoming more popular vis-a-vis the development of that in other fields of knowledge.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Acquired a good understanding of the concepts, theories and knowledge of research in art & design; - identify and analyze various attributes and characteristics of research in art & design both by thesis and by project; - develop intellectual ability to conceive and evaluate viable doctoral research issues in art & design; - develop critical, analytical and independent thinking; - be able to analyse, evaluate, synthesis knowledge and propose solutions to resolve identified problems; - address real-world cases of conducting research in art & design; - present and discuss in English effectively and clearly; - present experimental results in a professional report format; and - commit to lifelong learning.
Subject Synopsis/ Indicative Syllabus	This subject aims to provide students with a clear understanding of the differences the concept, content, methodology and formats of deliverables of doctoral research in art & design and that of other fields of research. The syllabus consists: • The Nature of Research versus Creation - The nature of research - The nature of creation • Research in the Affective Domain versus Research in the Cognitive Domain - Research in the affective domain, e.g., art, design, music, etc. - Research in the cognitive domain, e.g., physics, biology, chemistry, etc. • Research by Thesis versus Research by Project - Research by thesis - Research by project (also known as practice-led research or studio-based research)

Teaching/Learning Methodology	This subject comprises lectures, tutorials and seminars. The concepts, theories and knowledge of doctoral research in art & design will be taught through the respective lectures. Tutorials and seminars are designed and arranged to exemplify and foster the students’ understanding of the subject. Individual assignments and a presentation are employed for the assessment of the critical thinking, intellectual capacity, analytical and presentation skills of the students.										
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed								
			a	b	c	d	e	f	g	h	i
	Continuous Assessment	40%	✓	✓	✓	✓	✓	✓	✓		✓
	Examination	60%	✓	✓	✓	✓	✓	✓	✓	✓	
	Total	100%									
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Continuous assessment trains students to analyze and solve problems based on what they learn in class whereas examination evaluates whether the students have achieved the overall learning outcomes.										
Student Study Effort Expected	Class contact:										
	▪ Lectures										9 Hrs.
	▪ Tutorials										24 Hrs.
	▪ Seminars/Presentation										6 Hrs.
	Other student study effort:										
	▪ Self study										60 Hrs.
	▪ Preparation for assignments										21 Hrs.
	Total student study effort										120 Hrs.
