

Subject Description Form

Subject Code	ITC6000E
Subject Title	Analytical Supply Chain Management for Fashion Retailing
Credit Value	3
Level	6
Pre-requisite / Co-requisite / Exclusion	Basic calculus
Objectives	This subject aims to examine the latest development and the state-of-the-art research of fashion retail supply chain management. Specifically, the objectives are: To analytically explore the most critical challenges in fashion retail supply chain management. To investigate the information driven fashion retail supply chains. To analyze channel coordination issues in fashion retail supply chains via both analytical modeling and empirical analysis. Students are required to attend seminars, read assigned journal readings, submit a written report on an assigned topic in fashion retail supply chain management, and attend a final written exam.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Apply analytical tools and models to examine fashion retailing supply chain management problems. - Identify and analyze the critical managerial challenges in fashion retail supply chains. - Propose appropriate analytical solutions for fashion retail supply chain management problems. - Develop the analytical ability to conduct decent academic research in fashion retail supply chain management.

Subject Synopsis/ Indicative Syllabus	1. <u>Key Concepts and Principles of Fashion Retail Supply Chain Management (SCM)</u> Consumer-driven supply chain models. Retail-led supply chains. Current topics in fashion retail supply chains. 2. <u>Customer Service Management in Fashion Retail Supply Chains</u> Retail service quality model, service gap analysis, customer service measures. 3. <u>Inventory Models and Coordination in Fashion Retail Supply Chains</u> The classic analytical inventory control models for supply chain analysis. Coordination by supply contracts. 4. <u>Use of Information in Fashion Retail Supply Chain Management</u> The importance of information in a fashion retail supply chain. Efficient Consumer Response and Fast Fashion concepts in fashion retail supply chain systems. Mass customization. 5. <u>Contemporary Managerial Issues in Fashion Retail Supply Chain Management</u> A discussion on the latest developments and hot topics in fashion retail supply chain management, e.g., sustainability, risk analysis.																																						
Teaching/Learning Methodology	This subject comprises lectures, and seminars. Students are required to examine critical issues at a doctoral level in fashion retail supply chain management. They have to deliver and attend seminars. Class activities will involve group discussions and tutorials on research papers. Guided readings will be suggested for private study to complement the class materials.																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th></th><th></th></tr><tr><td>1. Coursework</td><td>40%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>2. Examination</td><td>60%</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td><td></td></tr><tr><td>Total</td><td>100%</td><td colspan="6"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: To pass this subject, students are required to obtain Grade D or above in BOTH the continuous assessment (Coursework) and final exam. Assignments (including home-works, class-works, and tutorial exercises) and an individual project are used to assess all the learning outcomes. A final examination is designed to assess most of the intended outcomes. A focal point is on analytical problem solving.
