

Subject Description Form

Subject Code	ITC2004T
Subject Title	Textile Studies II
Credit Value	3 credits
Level	2
Pre-requisite/ <Co-requisite> / (Exclusion)	Nil
Objectives	The subject aims to introduce the basic terminology, concepts and classification of fabrics for the fashion industry. The contents of the subject cover the essential elements in the formation, end-uses and properties of fabrics suitable for the production of apparel items.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Define and explain the essential terms in knitting, weaving and non-woven manufacture. - Describe and explain the formation principles of basic woven, knitted and non-woven fabrics. - Analyze, compare and relate the fabric structures and properties within the context of their application in apparel. - Identify different kinds of basic fabric structures and explain their main characteristics.
Subject Synopsis/ Indicative Syllabus	(I) Woven fabrics: basic formation principle and representation of a woven fabric, classification of woven fabrics, structure, properties and end-uses of woven fabrics. (II) Knitted fabrics: loop basic formation principle, representation of a knitted fabric, classification of knitted fabrics, structures, properties and end-uses of knitted fabrics. (III) Non-woven fabrics: fiber web formation principle, consolidation of fiber webs, properties and end-uses of non-woven fabrics. (IV) Basic fabric analysis: identification of basic fabric structures and fibers and yarns used, determination of fabric technical face and back, analysis of structural effect and feature.
Teaching/Learning Methodology	Teaching will be primarily conducted in lectures, which are supplemented by tutorials. Appropriate demonstration of the fabric samples and analysis methods, fabric production machineries and related tools and instruments will be conducted in the weaving and knitting laboratories.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d		
	1. Coursework	50%	✓	✓	✓	✓		
	2. Final Examination	50%	✓	✓	✓			
	Total	100%						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: As the lectures occupy more time in this subject, the coursework is very important to help students understand better teaching content. So Coursework has the same importance as Final Examination for the assessment of intended learning outcomes.							
Student Study Effort Expected	Class contact:							
	▪ Lecture						26 Hrs.	
	▪ Lab						18 Hrs.	
	Other student study effort:							
	▪ Assignments						64 Hrs.	
	Total student study effort						108 Hrs.
