

Subject Description Form

Subject Code	ITC2020R
Subject Title	Supply Chain Management in Fashion Retailing
Credit Value	3 credits
Level	2
Pre-requisite/ <Co-requisite> / (Exclusion)	Nil
Objectives	This subject has the following objectives: 1. To explore the concepts and principles of fashion retail supply chain management (FRSCM). 2. To analytically assess the performance of the alternative configurations of the fashion retail supply chains. 3. To analyse the importance of information in FRSCM. 4. To apply different tools for studying and solving FRSCM problems.
Intended Learning Outcomes	Students who have successfully completed the subject shall be able to: a. Apply analytical tools and models to explore FRSCM problems. b. Identify and analyze the challenges in FRSCM. c. Propose appropriate analytical solutions for solving the problems in FRSCM. d. Present and discuss in English effectively and clearly. e. Co-operate and contribute as a team member/leader.
Subject Synopsis/ Indicative Syllabus	(I) Concepts of Fashion Retail Supply Chain Management (FRSCM) The need for an integrated supply chain in the fashion industry. Structural design of a fashion retail supply chain. Selecting and evaluating the alternative configurations of fashion retail supply chains. Push-pull boundary. Fast fashion. Mass customization. (II) Inventory and Transportation Decisions in FRSCM Review of classical inventory management models such as the following: EOQ model, safety stock analysis, newsvendor problem. Transportation management in fashion retail supply chains. (III) Use of Information in FRSCM The importance of information in an integrated fashion retail supply chain environment. Efficient response programs, vendor-managed inventory, collaborative planning, forecasting and replenishment (CPFR), information distortion and the bullwhip effect in fashion supply chains. The applications of information technology. Risk pooling. (IV) Supply Contracts in FRSCM Basic concept of channel coordination. Retailer-led coordination. Characteristics of supply chain contracts in FRSCM. Game theory. Risk analysis. Bounded rationality. (V) Contemporary Issues in FRSCM

	A discussion on the latest developments and hot topics in FRSCM.							
Teaching/Learning Methodology	This subject comprises lectures and tutorials. Students are required to examine contemporary issues in the areas of fashion retail supply chain management, and have group discussions in tutorials. Simulation games and computerized experiments are used to further illustrate some important concepts. Guided readings will be suggested for private study to complement the subject.							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d	e	
	1. Short Assignments/Tests	25%	✓	✓	✓			
	2. Group projects	25%		✓	✓	✓	✓	
	3. Final exam	50%	✓	✓	✓			
	Total	100%						
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Short assignments (including home-works, class-works, and tutorial exercises), both individual and group-based, and tests are used to assess the first three learning outcomes related to the professional knowledge on FRSCM. A comprehensive group project, which includes case analysis and presentation, is employed to assess four learning outcomes, including the two generic outcomes d and e.								
Student Study Effort Expected	Class contact:							
	▪ Lecture		38 Hrs.					
	Other student study effort:							
	▪ Assignments + Reading		66 Hrs.					
	Total student study effort		104 Hrs.
