

Subject Description Form

Subject Code	ITC211FC
Subject Title	Digital Product Creation
Credit Value	3
Level	2
Pre-requisite/ Co-requisite/ Exclusion	Exclusion: ITC4060T Fashion Product Development and SFT207DD Digital Product Creation
Objectives	The subject provides the foundation knowledge of fashion concepts, apparel pattern design. It also trains the use of CAD techniques and processes of pattern design and construction.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) understand the basic techniques and processes in patterns design including obtaining accurate measurements from body form, block construction, dart manipulation; (b) demonstrate the use of 3D body scanning equipment and techniques; (c) formulate basic blocks for different garment types by CAD; (d) apply the technique of using CAD in pattern construction and style alternation/modifications; and (e) make use of CAD tools for grading and marker planning.
Subject Synopsis/ Indicative Syllabus	(I) Overview how to take accurate measurements from body form General rules on body measurements Block construction by using body measurements (II) 3D body scanning equipment and techniques Demonstration & application of equipment (III) CAD pattern design Basic block design Application of CAD on style alternation/modifications. Formulation of production patterns (IV) Grading and marker planning Sizing and pattern grading Manual and automatic marker planning Marker report and material utilization

Teaching/Learning Methodology	Lectures will be designed to deliver theories, concepts and facts of the subjects and to provide guidance on further readings and applications. Studio sessions will be used to supplement formal lectures with more interactive teaching and learning, and problem solving. Hands-on experience of CAD and demonstrations of pattern design techniques will also be provided. Online learning materials and self-learning exercises with step-by-step instructions will also be incorporated via LEARN@PolyU to enhance students' understanding of apparel construction.																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1" data-bbox="568 640 1412 1066"> <tr> <th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr> <tr> <th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr> <tr> <td>1. Projects</td><td>60%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>Total</td><td>100%</td><td colspan="5"></td></tr> </table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Students will be expected to understand basic techniques of clothing CAD pattern design in this subject. Such techniques will be acquired through extensive hands-on practice and exercises. Therefore, the course will be assessed by in-class assignments. Students will also be expected to communicate effectively and think critically by applying clothing CAD to support their future career, and such knowledge integration will be achieved through project work. In-class assignments and projects will be appropriate methods to assess students' proficiency in achieving the intended learning outcomes. Student Study Effort Expected	• Lecture	12 Hrs.
	• Studio	26 Hrs.
	Other student study effort:	
	• Self-study/Preparation	25 Hrs.
	• Project/Assignments	45 Hrs.
	Total student study effort	108 Hrs.
