

Subject Description Form

Subject Code	ITC212MC
Subject Title	Photography and Digital Presentations
Credit Value	3
Level	2
Pre-requisite/ <Co-requisite>/ (Exclusion)	<ITC313XC Fashion Product Ideation and Development>
Objectives	This subject offers student a chance to discover ability media for digital presentation in design, fashion and textiles industry. This is a creation path, which provides students with essential knowledge of CAD systems and targets to integrate technology or tools to guide extraordinary ranges in developing digital presentation particularly for international fashion, design or marketing industry. The subject also enables students to perceive special methodologies and equipment of designing digital presentations as well as applying appropriate virtual medium for the technology of design ideas.
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: - produce and manage fashion photo shoots; - make use of technology for layout composition and photo retouch; - identify the general purpose and benefits of CAD systems used in the fashion design industry; - explore effective techniques or tools for creating digital presentations to present innovative concepts and design ideas; - understand the ability to adopt CAD systems to facilitate design and development process; - communicate clearly and effectively in a professional manner; and - develop digital presentation portfolio
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	(I) Preparing fashion photo shoot Develop skills in producing fashion photo shoots Planning and managing a shoot from original idea to final image Photo-retouching and image manipulation Skills and techniques for color correction Basic techniques for handling images (II) Develop digital presentation portfolio Introduction of CAD systems adopted in design industry Layout, composition, color and typographic design Preparing professional presentation boards Drawing illustrations from design image to digital format Creating technical drawing in scale and details Develop digital portfolio professionally to communicate ideas

Teaching/Learning Methodology (Note 3)	A combination of lecture and studio is designed to provide general framework with specific reference to theoretical and practical issues. Studio will be used to provide hands-on experiences on CAD systems used in fashion design industry with more interactive learning and teaching as well as problem solving. A variety of in-class exercises, assignment and group project will be used to assess learning outcomes and student’s progress in different stage of their study.																																																				
Assessment Methods in Alignment with Intended Learning Outcomes (Note 4)	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="7">Intended subject learning outcomes to be assessed</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th>f</th><th>g</th></tr><tr><td>1. In-class exercises</td><td>10%</td><td>✓</td><td>✓</td><td></td><td></td><td></td><td></td><td></td></tr><tr><td>2. Individual assignments will be used to assess students’ ability of incorporating CAD systems for product design and development process, also to train them with critical and creative thinking. Group project will be used to evaluate student’s theoretical or practical knowledge, and their understanding of user interface (UI) design scenario in fashion media; the capacity of organizing and managing fashion photo shoots will also be assessed via group project.
