

Subject Description Form

Subject Code	ITC2204T
Subject Title	Foundations of Apparel Construction
Credit Value	3
Level	2
Pre-requisite/ Co-requisite/ Exclusion	Exclusion: SFT204FY Introduction to Apparel Techniques
Objectives	The subject provides the foundation knowledge of fashion concepts, apparel pattern design and apparel making techniques. It also develops understanding in apparel construction and apparel products.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) understand the key processes of converting a fashion sketch to an apparel product, including pattern design and construction, sewing, etc; (b) understand the basic techniques and processes in patterns design including obtaining accurate measurements from a dress form or body form, block construction, dart manipulation and style adaptation; (c) identify the construction of apparel products, particularly the stitching and seaming methods for different applications and functions; (d) perform pattern and sample construction for selected garment types; (e) recognize and describe the sub-materials and accessories in apparel products.
Subject Synopsis/ Indicative Syllabus	(I) Methods of Constructing Apparel Patterns Introduction of the methods being used in the fashion industry for construction of clothing patterns. (II) Basic Principles of Making Up Apparel Products Key elements of sewing and garment specifications. (III) Basic Seam and Stitch Types Classification and specification of basic seam and stitch types, and their applications in apparel products.

	(IV) Pattern and Sample Construction for Woven Skirts Understanding of the fashion product development of woven skirt, including design development, pattern construction, sample preparation and fitting assessment. (V) Sub-materials and Accessories Types and specification of sub-materials and accessories in apparel products, such as interlining, sewing thread, fastenings, etc.																																																						
Teaching/Learning Methodology	Lectures will be designed to deliver theories, concepts and facts of the subjects and to provide guidance on further readings and applications. Studio sessions will be used to supplement formal lectures with more interactive teaching and learning, and problem solving. Hands-on experience of pattern construction and demonstrations of stitching and seaming techniques will also be provided. Online learning materials and self-learning exercises with step-by-step instructions will also be incorporated via LEARN@PolyU to enhance students’ understanding of apparel construction.																																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr><tr><td>Continuous Assessment</td><td>100%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td><i>Sewing assignments</i></td><td>25%</td><td>✓</td><td></td><td>✓</td><td>✓</td><td></td></tr><tr><td><i>Sewing Report</i></td><td>25%</td><td>✓</td><td></td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td><i>Pattern assignments</i></td><td>25%</td><td>✓</td><td>✓</td><td></td><td>✓</td><td>✓</td></tr><tr><td><i>Pattern projects</i></td><td>25%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>Total</td><td>100%</td><td colspan="5"></td></tr></table>	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					a	b	c	d	e	Continuous Assessment	100%	✓	✓	✓	✓	✓	<i>Sewing assignments</i>	25%	✓		✓	✓		<i>Sewing Report</i>	25%	✓		✓	✓	✓	<i>Pattern assignments</i>	25%	✓	✓		✓	✓	<i>Pattern projects</i>	25%	✓	✓	✓	✓	✓	Total	100%

	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Pattern and sewing assignments: Students will be given assignments, including written and practical ones, at different stages of the learning process to enhance their understanding of the subject contents and problem solving skills in practical use of different sewing machineries. Pattern projects: These will involve a student-centred project for immediate and final learning assessment of practical skills on pattern design, garment development, sewing specifications, etc. Students' critical thinking and analytical skills in pattern construction and making up of apparel products are also assessed.	
Student Study Effort Expected	Class contact:	
	• Lecture	16 Hrs.
	• Studio	13 Hrs.
	• Workshop	10 Hrs.
	Other student study effort:	
	• Projects	66 Hrs.
	Total student study effort	105 Hrs.
