

Subject Description Form

Subject Code	ITC2206T
Subject Title	Techno Fashion Products
Credit Value	3
Level	2
Pre-requisite(s) / <Co-requisite> / (Exclusion)	Nil
Objectives	The subject introduces the frontier design, technologies, market trends and developments of fashion products, as well as the cutting-edge developments of the industry.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a. adopt a holistic approach toward the up-to-date techno fashion products; b. recognize the latest technologies applied in different types of techno fashion products; c. recognize the latest market trends and development of techno fashion products; d. develop and present new design concepts for techno fashion products with appropriate technologies and the most updated market trends information; e. communicate effectively and professionally with industry partners in the context of fashion innovations; f. develop critical and creative thinking.
Subject Synopsis/ Indicative Syllabus	(I) Concepts and Functions of Techno Fashion Products Understanding of the techno fashion products. Types of techno fashion products: 3D digital printed garments and accessories, smart fashion and textiles, and fashion accessories. (II) Technologies and Applications in Techno Fashion Products 3-dimensional digital printing technologies. Wearable electronics: sensors illuminative materials, wireless sensor network. Functional textiles. (III) Market Trends and Development of Techno Fashion Products Understanding of the market trends and development. Market needs of techno fashion products.

Teaching/Learning Methodology	Dissemination of knowledge through lectures, and tutorials in studio environment will be employed. This interactive approach will offer better opportunities for students to deepen their understanding of the concepts taught as well as gain hands-on experience in problem solving. Students will present solutions to problems in the student-centred projects.							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)

	Continuous assessment	100%	✓	✓	✓	✓	✓	✓
	1. Group Project – report & presentation	40%	✓	✓	✓	✓	✓	✓
	2. Integrated Design Project – concept research and development, design drawings & presentation	60%	✓	✓	✓	✓	✓	✓
	Examination	0%						
	Total	100%						
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The group project will assess students’ learning outcomes including theories related to the concepts and functions of techno fashion products, technologies applied and the market trends. The integrated design project will appraise students’ concept development, practical skills and innovation related to the development of new techno fashion products in the context of organisation and clarity, quality and the ideas conveyed. Students’ professionalism, including communication and presentation skills, as well as development of critical and creative thinking, will also be assessed.								
Student Study Effort Expected	Class contact:							
	▪ Lecture						26 Hrs.	
	▪ Tutorial						12 Hrs.	
	Other student study effort:							
	▪ Assignments						70 Hrs.	
	Total student study effort						108 Hrs.
