| <b>Pre-requisite/<br/>&lt;Co-requisite&gt; /<br/>(Exclusion)</b> | ITC3072D Fashion Design II                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Objectives</b>                                                | <ol style="list-style-type: none"> <li>1. To reinforce the knowledge of developing fashion collection, which is aesthetical, functional and with a theme.</li> <li>2. To develop the sensitivity for current global issues, e.g., environment issues.</li> <li>3. To reinforce the skill to research and analyse emerging fashion trends and current global issues.</li> <li>4. To reinforce the skill to present effectively design ideas and collections about fashion and textiles based on research and analysis.</li> <li>5. To reinforce the skill to communicate effectively and professionally in fashion and textile design in particular and fashion business in general.</li> <li>6. To reinforce the skill in team work as well as individual work in handling common daily operational problems arising from managing a small design team.</li> </ol> |
| <b>Intended Learning Outcomes</b>                                | <p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Apply knowledge and techniques of fashion design to create fashion collection, which is aesthetical, functional and with a theme.</li> <li>b. Research and analyse the emerging fashion trends and current global issue.</li> <li>c. Integrate research and analysis effectively into design concept, fabric development and an innovative design collection.</li> <li>d. Implement the required skills and techniques of presenting fashion concepts and ideas effectively and professionally.</li> <li>e. Create and professionally present a well-balanced coherent fashion collection with a distinctive message.</li> <li>f. Realise one of the designs into a professionally finished outfit through the making of test garment</li> </ol>        |
| <b>Subject Synopsis/<br/>Indicative Syllabus</b>                 | <p><b>(I) Fashion Aesthetics and Functions</b><br/>Evaluation of the balance of aesthetics and functions in fashion.</p> <p><b>(II) Fashion and Global Issues</b><br/>Evaluation of fashion in light of global current issues, e.g. environmental issue.</p> <p><b>(III) Manipulation of Design Elements and Principles for Creative Ideas</b><br/>Manipulation of silhouette, proportion, texture, pattern and prints, colour, fabric, cut, details, and fashion accessories for creating original fashion statements.</p>                                                                                                                                                                                                                                                                                                                                        |

| <b>Teaching/Learning Methodology</b>                                   | Dissemination of knowledge to small groups through lectures, tutorials and practice in studio environment will be employed. This interactive project-based approach offers better opportunities for students to deepen their understanding of the concepts taught as well as hands-on experience in problem solving. It will include team work that facilitates the environment for interpersonal skills, and individual project that demonstrates student’s own design ability and commitment. Students will document the design process and present solutions to problems solved in assigned project work on the student-centred projects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                   |             |                                                                                |   |   |   |  |  |   |   |   |   |   |   |                                             |     |   |   |   |   |   |   |                          |     |   |   |   |   |   |   |       |      |  |  |  |  |  |  |

It is particularly suitable for design project which usually requires a project portfolio that involves the synthesis of design process, presentation and class participation. It is a sustained means of assessment in providing relatively prompt feedback: it serves to reinforce or correct learned responses; and it has a strong impact on and improves the quality of student learning.</p> | Specific assessment methods/tasks | % weighting | Intended subject learning outcomes to be assessed (Please tick as appropriate) |   |   |   |  |  | a | b | c | d | e | f | 1.
