

Subject Description Form

Subject Code	ITC3089E
Subject Title	Woven Fabric Design Project
Credit Value	3
Level	3
Pre-requisite(s) / <Co-requisite> / (Exclusion)	Nil
Objectives	The subject develops the creative competence and provides the technical knowledge required in the design and manufacture of woven fabrics. It explores the integration of weaving technology and woven fabric design, and thus facilitates the creation of portfolios of woven fabrics.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) identify the woven fabric structure and characteristics for textile product development; describe and produce woven fabrics with different yarns and constructions; (b) integrate the design with weaving technologies for the design and production of woven fabrics; (c) use CAD/CAM systems to design and facilitate follow-on production processes for woven fabrics; (d) put together a portfolio and effectively present the contents of the same for woven fabric design projects; (e) communicate effectively and professionally.
Subject Synopsis/ Indicative Syllabus	(I) Fundamental Knowledge of Woven Fabric Weaving machines and woven fabric formation Weave representations and weaving plans Color and weave effects and advanced weaves Woven fabric constructions (II) Designs and Manufacturing Technologies of Woven Fabric Elements of woven fabric design Pattern and figure design methods Appreciation of design elements Selection of fabric structural parameters Jacquard woven fabric design and production (III) Analysis of and Experimentation in Woven Fabric Formation Implementation of CAD/CAM systems Hands-on experience in fabric formation Experimentation on the effect of yarn types and weaves on fabric properties and appearance Production of woven fabric

	(IV) Woven Fabric Design Portfolio Implementation of a woven design project Woven fabric design portfolio Presentation of design project																																																				
Teaching/Learning Methodology	Project-based learning will be adopted for this subject. Lectures will be designed to provide the basic knowledge of the subject before projects assignment. Projects will involve drawing drafts, designing and producing woven fabrics. Students will produce woven fabric portfolios and present woven fabric design projects. The interactive approach will offer better opportunities for students to deepen their understanding of the concepts taught as well as gain experience in problem solving and creative thinking.																																																				
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr> <tr> <th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr> </thead> <tbody> <tr> <td>Continuous assessment</td><td>100%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>1. Assignment</td><td>30%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>2. Project/Presentation</td><td>70%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr> <tr> <td>Examination</td><td>0%</td><td></td><td></td><td></td><td></td><td></td></tr> <tr> <td>Total</td><td>100%</td><td colspan="5"></td></tr> </tbody> </table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The assignment report aims to assess students' knowledge, creativity and practical skills in woven fabric design and production. Presentation and portfolio will provide assessments for learning outcomes a to e. The projects will be designed to allow students to demonstrate and present their knowledge, creativity and practical skills in woven fabric design and production through the woven fabric portfolio, technical production report and project presentation.
