

Subject Description Form

Subject Code	ITC3214M
Subject Title	Omni-channel Marketing and Retailing
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	Pre-requisite: ITC2013M Fashion Marketing Exclusion ITC342MC Digital Marketing and Data Analytics and SFT339E Omni-channel Marketing and Retailing
Objectives	The subject introduces the theoretical and practical perspectives of omni-channel fashion marketing and retailing and formulates the omni-channel strategy and planning for fashion brands. It also explores the latest technologies to develop the mobile and social media applications and the ways to integrate them with the services in physical stores.
Intended Learning Outcomes	On successfully completing this subject, students will be able to: (a) understand the basics of omni-channel retailing; (b) address customer demand in the omni-channel retail environment; (c) source the right technologies for omni-channel implementation; (d) formulate a sustainable implementation strategy for omni-channel retailing and marketing; (e) develop mobile application solutions for the fashion brands omni channel operations.
Subject Synopsis/ Indicative Syllabus	(I) Overview Basics of omni-channel marketing The rise of social commerce and marketing and their integration with brick-and-mortar shops Cutting edge technology applications in omni-channel retailing (II) Retail and Marketing Management Focus Case studies of omni-channel retailing Omni-channel merchandising and planning Logistics management in omni-channel retailing Creative approaches to explore new customer value and experience (III) Technology Management Focus User Experience (UX) Design, development, and implementation of mobile applications for omni-channel fashion retailing and marketing Big data analysis of consumer behavior in mobile and social media channels

Teaching/Learning Methodology	The fundamental concepts of omni-channel retailing, business cases, and best practices in the industry will be delivered in lectures. Tutorials will be conducted in both the classroom and the computer lab so that students may both experience, design and develop, mobile applications that are suitable for fashion and luxury goods retailers. There will be guest speakers on specific topics and on the trend of omni-channel retailing in the fashion industry. A flipped classroom approach will be used in some lectures, to supplement the tutorials that have technical contents.																																															
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th></tr><tr><td>Continuous Assessment</td><td>50%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td></tr><tr><td>1. 	Design a new conceptual mobile store that is connected with the brick and mortar store operations integration. The project needs to present the objectives, selection of technologies, key data for consumer analysis. The app design must provide added value within the brick and mortar store, and it should enrich customer retail experience. The presentation should be in PowerPoint format, and the flow of user interface of the app must be well presented. Final exam 50% Assess students' knowledge in understanding the basics of e-commerce and digital marketing, how they are used in addressing customer demand in an omni-channel retail environment, and propose appropriate technologies and sustainable implementation strategies.	
Student Study Effort Expected	Class contact:	
	• Lecture	26 Hrs.
	• Tutorial	12 Hrs.
	Other student study effort:	
	• Group projects and assignment	70 Hrs.
	Total student study effort	108 Hrs.
