

Subject Description Form

Subject Code	ITC342MC
Subject Title	Digital Marketing and Data Analytics
Credit Value	3
Level	3
Pre-requisite/ Co-requisite/ Exclusion	ITC314MC Social Media and Fashion Journalism
Objectives	The course aims to develop understanding of the theory and foundations of digital marketing analytics and to provide experience of the application of using of digital data in communication planning and design. The goal of this class is to prepare students to be effective marketing leaders in a landscape that involves digital initiatives and data. Students will learn to evaluate different analytics approaches and will gain hands-on practice gathering and analyzing large digital data sets containing both structured and unstructured data. Students will gain experience addressing questions such as: “What is the ROI of my social media initiative?”, “How should I target my paid ads?”, “What are users saying about my brand?”, and “Should I invest in this new analytics tool?”
Intended Learning Outcomes <i>(Note 1)</i>	Upon completion of the subject, students will be able to: - define and explain the nature of digital marketing analytics; - be aware of a range of digital marketing principles and theoretical concepts; - critically evaluate the main techniques of digital marketing analytics; - demonstrate a knowledge of various strategies for increasing traffic and provide an assessment of their advantages and disadvantages in specific contexts; - critically reflect upon how to sustain and respond to digital marketing analytics outcomes; - demonstrate an awareness of and critical appreciation of digital marketing analytics in practice through developing and promoting digital content that they have created; - generate appropriate solutions to digital marketing analytics problems through identifying the barriers and facilitators of audience growth and message reach for their online content.
Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i>	The course will provide a survey of digital marketing topics including: (I) Digital advertising Display, search, and social media advertising ecosystems; common metrics and defining KPIs; attribution; evaluating ROI and allocating funds; segmentation and targeting. (II) Search engine optimization Content marketing, search analytics

[illegible]

	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: 20% is given for student's assignments and participation in terms of quality of questions, answers and student engagement in both lectures and tutorials Online quizzes will be provided to assess students' understanding on subject matters. All quizzes are open book. There are either multiple choice questions and/or short questions. Students are advised NOT to click on quizzes link until you are ready to take the quiz. There is no retakes, you can only take the quiz once. The subject has a group project, which requires the students to develop a social media enabled strategy and marketing plan to promote a fashion brand. The project requires a project proposal and presentation as well. A final 2-hour exam will be closed book examination.
