

Subject Description Form

Subject Code	ITC4038K
Subject Title	Advanced Knitwear Design
Credit Value	3 credits
Level	4
Pre-requisite/ <Co-requisite> / (Exclusion)	ITC3034K Knitwear Design & ITC3036K Yarn Design Project
Objectives	This subject aims to provide students a platform to learn through extensive experimentation in the areas of (both knitted fabric design and fashion knitwear design and production. Exposing to knitwear design possibilities offered by current technology, students are able to develop individually steered by their interests and preferences. (It offers students an opportunity to develop an exciting and innovative approach to fashion knitwear design. Design details would be included in all aspects of the knitwear from fibre to garment. With subtle development differences the students can evolve to become a new breed of knitwear designer with substantial support of knowledge in technology. The student may also find his/ her position in the industry as outstanding personnel in, product development for knitting yarn and knitwear or merchandising manager.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - Identify and describe the structure and characteristics of coarse gauge knitwear and the yarn used. - Relate the knitwear product characteristics to those of the yarn and knitting parameters and fabric structure. - Describe, record and produce sample swatches comprising the essential stitch variations applicable to the design and production of knitwear. - Demonstrate a proficient knowledge of the capability of the most sophisticated automatic flat knitting machine essential to the production of top end knitwear. - Utilize their integrated knowledge of knitwear design, technology and production to successfully undertake and complete a knitwear design project, in the process creating, producing and professionally presenting a portfolio of knitwear designs and products.
Subject Synopsis/ Indicative Syllabus	(I) Yarns for Knitting - Overview of yarn types suitable for knitwear including yarn construction and fibre contents. - Essential technological aspects in the formation of blended yarns, ply yarn and fancy yarn for knitwear. - General effects of yarn characteristics on knit structure and knitted garment.

	(II) CAD/CAM Application in Knitwear Design • Application of appropriate CAD system in knitwear Design. • Use of up-to-date knitting equipment in design mock up and production of design collection. • Garment fitting coarse gauge knitting production. (III) Knitwear Design Portfolio • Creation of knitwear design portfolio aided by current technology such as CAD and digital imagery. • Presentation of design projects at various levels of knitwear creation from yarn to garment resulting in fashion collection that may include both knitted and woven elements. • Innovation and experimentation for various Explorative design projects. • Creative design projects.																																						
Teaching/Learning Methodology	Learning is essentially student centered through projects. Guidance will be provided in the form of short lectures or seminars on core areas to stimulate understanding and exploration of fundamental knitwear relate knowledge. Design project will be assigned in the second stage to reinforce the studied subject materials. Through design project presentation and peer critique, inadequate areas can be identified and improved. Support is also sought from the knitwear industry in the provision of latest trend information, seminars and internship.																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th></th></tr><tr><td>1. Continuous assessment</td><td>30%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td></tr><tr><td>2. Portfolio</td><td>70%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td></tr><tr><td>Total</td><td>100%</td><td colspan="6"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The Assignment and final project are designed to allow students to learn and apply the machine knitting techniques along with the correct selection of yarns in developing stitches which express individual innovation and creativity. The swatches created in the final project could be further developed and utilized in knitwear portfolio and collection. Student Study Effort Expected	Class contact:	
	▪ Lecture	27 Hrs.
	▪ Lab	27 Hrs.
	Other student study effort:	
	▪ Assignments	50 Hrs.
	Total student study effort	104 Hrs.
