

Subject Description Form

Subject Code	ITC4061R
Subject Title	Fashion Retail Information Systems Management
Credit Value	3 credits
Level	4
Pre-requisite/ <Co-requisite> / (Exclusion)	ITC2020R Supply Chain Management in Fashion Retailing
Objectives	This subject aims at providing an in-depth exploration of the challenges, techniques, and technologies associated with the fashion retailing information systems in a competitive environment. The subject focuses on real case analysis from a management information systems (MIS) perspective and students are required to study, analyse, and explore the managerial issues for fashion retail information systems with a critical mind.
Intended Learning Outcomes	Upon completion of the subject, students shall be able to: - apply various theories and frameworks to analyse information systems management problems for fashion retailers; - manage appropriate changes in the fashion retailers to deal with information systems adoption; - identify the areas of applications of the fashion retail enterprise systems; - propose solutions to fashion retailing problems by using fashion retail information systems; - present and discuss in English effectively and clearly; and - co-operate and contribute as a team member/leader.
Subject Synopsis/ Indicative Syllabus	(I) Concepts and Principles of Fashion Retail Information Systems Different types of information systems. Classifications schemes. Core dimensions in fashion retail information systems. (II) Information Technology Infrastructure Managing software and hardware assets. The importance of network. (III) Enterprise Systems in Fashion Retailing ERP systems, supply chain management systems, collaborative commerce. (IV) Change Management in Fashion Retail Information Systems Business process re-engineering. Systems development cycle. System development methodology. Project management. (V) Understanding Business Value of Fashion Retail Information Systems Project evaluation. Engineering economics. Cash flow analysis. Mean-variance analysis. Scoring model. (VI) Information Systems Security and Control in Fashion Retailing

	System vulnerability and risk. Reliability analysis. Disruption management. (VII) Managing Information Systems for International Fashion Retailers Information management. Strategic partnerships. (VIII) Contemporary Issues in Fashion Retail Information Systems A discussion on the latest developments and hot topics in fashion retail information systems.							
Teaching/Learning Methodology	Since the subject focuses on real case analysis from a management information systems (MIS) perspective, students need to participate in class discussions, both in lectures and tutorials. Students are also required to examine contemporary issues in the areas of fashion retail information systems, and have group discussions in tutorials. Guided readings will be suggested for private study to complement the subject.							
Assessment Methods in Alignment with Intended Learning Outcomes								
	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d	e	f
	1. Short Assignments/Tests	25%						
	2. Group Projects	25%						
	3. Final Exam	50%						
	Total	100%						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Short assignments (including home-works, class-works, and tutorial exercises), both individual and group-based, and tests are used to assess the first four learning outcomes related to the professional knowledge on fashion retail information systems. A comprehensive group project, which includes case analysis and presentation, is employed to assess four learning outcomes, including the two generic outcomes d, e and f. A final exam is used to test the students for their ability in achieving outcomes a, b, c and d.							
	Student Study Effort Expected	Class contact:						
		• Lecture				26 Hrs.		
• Tutorial				12 Hrs.				
Other student study effort:								
• Assignments and reading				66 Hrs.				

	Total student study effort	104 Hrs.
