	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: The continuous assignments and the final portfolio will be designed to allow students to demonstrate their progress, creativity thinking, problem solving skills and time management during the whole process. The guidance from the tutor will further improve the quality of the portfolio. The materials submitted for all assessments must be the student’s own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. However, students could utilise various media and technologies such as GenAI to assist with design research in the preliminary stage. They are required to declare the use of GenAI in their work if applicable. Submitting GenAI-generated materials as students’ own work or part of their work without declaration is an act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.
