

Subject Description Form

Subject Code	ITC4070I
Subject Title	CAD for Intimate Apparel
Credit Value	3 credits
Level	4
Pre-requisite/ <Co-requisite> / (Exclusion)	ITC3016I Intimate Apparel Patternmaking or ITC3008T Advanced Apparel Pattern or ITC3072D Fashion Design II or ITC3040T Computer Technology for Fashion and Textiles
Objectives	This subject provides students with practical knowledge of CAD systems employed in the intimate apparel industry. Students will adopt the integration of CAD as a tool at all stages of the design and development process including pattern construction, grading, and marker making.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: a. identify the purpose of CAD applications used in the fashion industry in general; b. analyse the functions of different tools in a CAD system; c. apply the principles of CAD for the pattern design, grading, and marker making; d. demonstrate an ability to incorporate CAD systems to facilitate intimate apparel pattern design, grading and marker making; e. demonstrate the necessary communication skills to present pattern design ideas and concepts at a level acceptable to industry. Also, demonstrate punctuality and participation as the industry requires.
Subject Synopsis/ Indicative Syllabus	(I) Fundamentals of Intimate Apparel CAD System Advantages in using CAD in apparel production (II) Applications of Intimate Apparel Pattern CAD System Pattern design Digitising Grading Marker making (III) Practical CAD Skills Development Basic bra pattern draft Style manipulation Pattern grading and sizing Marker management
Teaching/Learning Methodology	This subject will be taught through a series of practical demonstrations in the computer laboratory. Students will be given a style of intimate garment to create, manipulate and grade. It is designed to develop students' critical thinking, analytical skills, teamwork, and oral and written communication

	skills.							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			a	b	c	d	e	
	1. Test	20%						
	2. Individual Work	70%						
	3. Participation	10%						
	Total	100%						
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: For ILO a, b, & c, student’s comprehension of CAD system used in the intimate apparel industry will be assessed via a serious of tests. For ILO b, c, d, & e, students’ pattern development skills will be assessed via individual weekly assignment. For ILO e, students’professionalism including communication skills and punctuality will be assessed via attendance and participation in class.							
Student Study Effort Expected	Class contact:							
	• Lecture				26 Hrs.			
	• Tutorial/ Studio				12 Hrs.			
	Other student study effort:							
	• Assignments				66 Hrs.			
	Total student study effort				104 Hrs.
