

Subject Description Form

Subject Code	ITC4204T
Subject Title	Fit Solutions
Credit Value	3
Level	4
Pre-requisite(s) / <Co-requisite> / (Exclusion)	ITC3211D Occasion Wear Design or ITC3220I Fit Concepts
Objectives	The subject provides advanced knowledge of apparel fit and essential techniques of pattern amendment to solve the fitting problems in fashion design and product management.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - apply the criteria of fitting apparel to a live model fitting; - analyse various cases of fit evaluation, diagnosis and problem solving; - study the mechanical effects of material tension and body weight on the apparel fit in terms of support and curve shaping; - correct the fit by the logical approach of pattern amendment or material change.
Subject Synopsis/ Indicative Syllabus	(I) Materials and Structure of Human Body Musculoskeletal system Fatty and glandular tissues Skin properties Critical body landmarks and measurement analysis (II) Stretch-to-fit Concepts Fitting rules Challenges of fit Live model fitting Examples of fit solutions for woven, stretch, underwear and outerwear (III) Case Studies – Fitting Diagnosis and Solutions Intimate apparel, e.g. plus-size bra, panty, swimwear Stretch apparel, e.g. activewear Non-stretch woven outerwear, e.g. coat, jacket. (IV) Advanced Pattern Amendment Pattern rules Pattern and garment specifications Iteration of pattern amendment and mock-up fitting

Teaching/Learning Methodology	Lectures will be conducted to introduce the essential body structure and materials affecting the stretch apparel fit. Live model fitting workshops will be arranged and conducted by industrial experts to demonstrate the professional practice of fit analysis. Case studies will enable students to diagnose the fitting problems and synthesize optimal solutions for various types of apparel. In the tutorials, students will interactively develop the fit solutions for the different cases. Video-annotation will assist the students to understand the factors affecting the apparel fit in action. The project will allow students to apply the theories in practice. They will iteratively amend pattern sets and sew up the garments to achieve a satisfactory fit on live models, analyse the results and present their findings.					
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)			
			a	b	c	d
	Continuous Assessment	100%	✓	✓	✓	✓
	1. Written report (Live model fitting)	20%	✓			
	2. Case study	20%		✓		
	3. Video-annotation	10%			✓	
	4. Project	50%				✓
	Examination	0%				
	Total	100%				
Student Study Effort Expected	Class contact:					
	▪ Lecture				12 Hrs.	
	▪ Studio				26 Hrs.	
	Other student study effort:					
	▪ Assignments				67 Hrs.	
	Total student study effort				105 Hrs.
