

Subject Description Form

Subject Code	ITC4213E
Subject Title	Information Systems Management for Fashion Business
Credit Value	3
Level	4
Pre-requisite(s) / <Co-requisite> / (Exclusion)	ITC2207M Fashion Retail Supply Chain Management
Objectives	The subject provides an in-depth exploration of the challenges, techniques and technologies associated with the fashion retailing information systems in a competitive environment. It focuses on real case analysis from a management information system (MIS) perspective. It also encourages the analysis and exploration of managerial issues for fashion retail information systems.
Intended Learning Outcomes	Upon completion of the subject, students shall be able to: a. apply various theories and frameworks to analyse information systems and solve management problems for fashion retailers; b. learn how the fashion retailers change appropriately to deal with information systems adoption; c. identify the areas of applications of the fashion retail enterprise systems; d. propose solutions to fashion retailing problems by using fashion retail information systems; e. demonstrate the necessary communication skills to present works at a level acceptable to industry; f. co-operate and contribute as team members/leaders.
Subject Synopsis/ Indicative Syllabus	(I) Concepts and Principles of Fashion Retail Information Systems Different types of information systems. Classifications schemes. Core dimensions in fashion retail information systems. (II) Information Technology Infrastructure Managing software and hardware assets. The importance of networks. (III) Enterprise Systems in Fashion Retailing ERP systems, supply chain management systems, collaborative commerce. (IV) Change Management in Fashion Retail Information Systems Business process re-engineering. Systems development cycle. System development methodology. Project management.

	(V) Understanding Business Value of Fashion Retail Information Systems Project evaluation. Engineering economics. Cash flow analysis. Mean-variance analysis. Scoring model. (VI) Information Systems Security and Control in Fashion Retailing System vulnerability and risk. Reliability analysis. Disruption management. (VII) Managing Information Systems for International Fashion Retailers Information management. Strategic partnerships. (VIII) Contemporary Issues in Fashion Retail Information Systems The latest developments and hot topics in fashion retail information systems.																																																						
Teaching/Learning Methodology	Since the subject focuses on real case analysis from a management information systems (MIS) perspective, students will need to participate in class discussions, both in lectures and tutorials. Students will also be required to examine contemporary issues in the areas of fashion retail information systems and will have group discussions in tutorials. Guided readings will be provided as references for case studies.																																																						
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th>e</th><th>f</th></tr><tr><td>Continuous Assessment</td><td>50%</td><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td><i>1.
