

Subject Description Form

Subject Code	ITC4214E
Subject Title	Customer Relationship Management
Credit Value	3
Level	4
Pre-requisite(s) / <Co-requisite> / (Exclusion)	ITC2013M Fashion Marketing
Objectives	The subject provides a background and an understanding of customer relationship management, which is a comprehensive approach for creating, maintaining and expanding customer relationships. It covers advances in customer relationship management technologies and channels for real-time, mobile data, particularly customer data in relation to customer experience strategy.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - understand different types of customer relationship management; - describe and analyse the key components in customer relationship management and their impacts on the fashion retailing business; - analyse and evaluate different customer relationship strategies and practices in the fashion business; - adopt a critical approach to analyse and transform customer-related information to suitable customer relationship strategies.
Subject Synopsis/ Indicative Syllabus	(I) Types of Customer Relationship Management <u>Operational</u> Sales, marketing and service. <u>Analytical</u> Collect data, analyse and interpret data, and apply data. <u>Collaborative</u> Internal and external collaborations. (II) Main Components in Customer Relationship Management Main components of CRM including personnel, technology and organisation, understanding of the value, behavior and attitudes of different customers and customer groups, proposition to different segments of customers, design of customer management activity, measurement of the effects, understanding of customers' experiences, customer satisfaction, retention, profitability and etc., so as to build and manage customer relationships through different stages

	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Tests and/or case discussions will be used to assess the first two learning outcomes related to the key components and types of CRM. A group project, which includes case analysis, comparison and presentation, will be employed to assess the other two learning outcomes. In this exercise, students will have to analyse, evaluate and compare the strategies and practices. Students will also be required to analyse customer information so as to formulate suitable customer relationship strategies in a professional manner.	
Student Study Effort Expected	Class contact:	
	• Lecture	26 Hrs.
	• Tutorial	12 Hrs.
	Other student study effort:	
	• Assignments and reading	67 Hrs.
	Total student study effort	105 Hrs.
