

Subject Description Form

Subject Code	ITC6000Q
Subject Title	Research Methodology for Research Postgraduate Students
Credit Value	3
Level	6
Pre-requisite/ Co-requisite/ Exclusion	Nil
Objectives	This course aims to teach the foundation of Research Methodology for research postgraduate students in each discipline in the School of Fashion and Textiles, including design, technology, and business. Discipline specific contents are designed to guide, instruct, and train students of these disciplines to develop rigorous and high quality research projects.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - comprehend the foundational types of research, research methodologies, and general practices involved in the discipline (design, technology or business) - comprehend the methods in data collection and data analysis for the research of the discipline (design, technology or business) - exercise research design using the appropriate research methodology in the discipline (design, technology or business) - develop critical-thinking skills in evaluating the quality of research methodology applied for the research of the discipline (design, technology or business)
Subject Synopsis/ Indicative Syllabus	All students: <u>Week 1</u> • Introduction to research methodology in fashion ○ Ontology and epistemology of research ○ Qualitative vs. quantitative research overview ○ Research ethics overview <u>Week 2-13</u> • Design students: Design Research Methodology ○ The role of naturalistic inquiry and reflective practices in design research ○ Design research evolution and perspectives ○ Research methodologies in modern day design research ○ Design research design, data collection methods, and analysis ○ Qualitative and quantitative approaches in design research • Technology students: Textile Technology Research Methodology ○ Types of textile technology research ○ Textile technology research methodologies ○ Experimental research design, methods, and analysis

	○ Validity and reliability ○ Research ethics in textile technology research ● Business students: Business Research Methodology ○ Types of fashion business research ○ Qualitative and quantitative approaches for business research in fashion ○ Business research methodologies in fashion ○ Business research design, data collection methods, and analysis ○ Validity and reliability ○ Research ethics in fashion business research																																														
Teaching/Learning Methodology	● Lectures will deliver learning material through lectures and in-class discussion formats. ● Lecture and peer evaluation will be used to encourage interactive learning, exercise critical thinking, and assess student’s learning outcomes.																																														
Assessment Methods in Alignment with Intended Learning Outcomes	<table><tr><th rowspan="2">Specific assessment methods/tasks</th><th rowspan="2">% weighting</th><th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th></tr><tr><th>a</th><th>b</th><th>c</th><th>d</th><th></th><th></th></tr><tr><td>In-class discussion participation</td><td>20%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>Research study development assignment</td><td>20%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>Research paper report and discussion</td><td>60%</td><td>✓</td><td>✓</td><td>✓</td><td>✓</td><td></td><td></td></tr><tr><td>Total</td><td>100%</td><td colspan="6"></td></tr></table> Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Continuous assessment: Pre-class activities, class attendance & in-class participation will be assessed. Research study development: Students must develop and design a research study, based on their disciplines. This will help exercise student’s ability in designing quality and rigorous research based on research methodologies taught in each discipline. Research paper report and discussion: Student must read assigned research reading and develop discussion and synopsis based on them. The materials submitted for all assessment must be the student’s own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. Submitting GenAI-generated materials as students’ own work or part of their work is an	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)						a	b	c	d			In-class discussion participation	20%	✓	✓	✓	✓			Research study development assignment	20%	✓	✓	✓	✓			Research paper report and discussion	60%	✓	✓	✓	✓			Total	100%

	act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.	
Student Study Effort Expected	Class contact:	
	▪ Lectures	12 Hrs.
	▪ Seminars/Presentations	24 Hrs.
	Other student study effort:	
	▪ Reading, assignments, and research	69 Hrs.
	Total student study effort	105 Hrs.
