

Subject Description Form

Subject Code	ITC6957RT
Subject Title	Guided Study in Practice-led Design Research
Credit Value	3
Level	6
Pre-requisite / Co-requisite / Exclusion	Pre-requisite: Background knowledge in fashion and textile design
Objectives	The subject intends to guide research students to acquire an in-depth study of the concept, content, methodology and formats of deliverables of PhD by project, also called practice-led PhD or studio-based PhD, as opposed to the “traditional” PhD by thesis. Prior successful cases will be cited to elucidate and expound the unique nature of this type of doctoral research which is becoming more popular in Europe, with those in the art and design disciplines in particular.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: - acquired a good understanding of the concepts, theories and knowledge of practice-led PhD with particular reference to fashion and textiles; - identify and analyze various attributes and characteristics of practice-led PhD; - develop intellectual ability to conceive and evaluate viable practice-led PhD issues; - develop critical, analytical and independent thinking; - be able to analyse, evaluate, synthesise knowledge and propose solutions to resolve identified problems; - address real-world cases of conducting research in design; - present and discuss in English effectively and clearly; - present experimental results in a professional report format; and to - commit to lifelong learning.
Subject Synopsis/ Indicative Syllabus	This subject aims to provide students with theoretical and professional knowledge in Practice-led PhD, with particular reference to fashion and textiles. The syllabus consists: Week 1-2 • The Nature of Research versus Creation - The nature of research - The nature of creation Week 3-13 • Research in Art versus Research in Science - Research in art - Research in science • Research by Thesis versus Research by Project - Research by thesis - Research by project
Teaching/Learning Methodology	This subject comprises tutorials and seminars. The concepts, theories and knowledge of practice-led PhD (also known as studio-based PhD or PhD by project) in design, with particular reference to fashion and textiles, will be delivered through the respective tutorials. Seminars are designed and arranged to exemplify and foster the students’ understanding of the subject. Individual assignments and a presentation are employed for

	the assessment of the critical thinking, intellectual capacity, analytical and presentation skills of the students.										
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed								
			a	b	c	d	e	f	g	h	i
	Coursework	40%	✓	✓	✓	✓	✓	✓	✓		✓
	Examination	60%	✓	✓	✓	✓	✓	✓	✓	✓	
	Total	100%									
	Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes: Coursework trains students to analyze and solve problems based on what they learn in class. Examination evaluates whether the students have achieved the overall learning outcomes. The materials submitted for this assessment must be the student’s own work. The submitted work may not be accepted for the purpose of assessment if its authenticity is questionable. Submitting GenAI-generated materials as students’ own work or part of their work is an act of academic dishonesty. Students who are found committing academic dishonesty will face disciplinary actions.										
Student Study Effort Expected	Class contact:										
	▪ Tutorials									17 Hrs.	
	▪ Seminars									9 Hrs.	
	Other student study effort:										
	▪ Self study									29 Hrs.	
	▪ Preparation for assignments									50 Hrs.	
	Total student study effort									105 Hrs.
